MODULE LNWS(S) 2 LOCAL INSTRUCTIONS

Hard copy Sectional Appendix pages 255-255A

Explanation of change: Add a second row in the table for Proof House Jn; misrouting to Snow Hill workstation

Amend the section 'Forming of trains on Reception lines' to read as follows:

MD137 - HARLESDEN JN TO WEMBLEY CENTRAL (WEMBLEY YARD LINES)**Wembley Yard / Wembley European Freight Operating Centre (WEFOC)**

'Jumbo' services shall be formed by two or more individual trains that shall arrive into the Reception lines at differing times. These trains are to be combined into one, prior to departing towards Willesden South Jn.

Prior to a train arrival, the FOC shunter shall contact the Signaller and reach a clear understanding of any train movements that are required to form multiple train portions together.

South end arrivals: The first arrival shall arrive on an available Reception Line. The locomotive shall be detached by the FOC shunter. The Signaller shall clear both WM793 Signal and WY115 Signal with the opposing locking arrangement on request towards the Shunt Neck, L or M Loco Sidings. The locomotive shall arrive behind WY115 Ground Position Signal (GPS) and not enter the siding. Alternatively, the Signaller may route the locomotive onto the Up Slow to arrive behind WM338 Signal. The locomotive run round shall be completed, with the locomotive attaching to the south end of the train.

The second train shall arrive on an available Reception Line adjacent to the first train. The FOC shunter shall depart the first train towards the south arriving the rear of train behind the Ground Position Signal (GPS) pre-agreed with the Signaller (WY158, WY160, WY184 or WY186). The FOC shunter shall contact the Signaller and confirm to the driver that the GPS has cleared towards the correct Reception Line to which the second train is stabled on. The FOC shunter shall control the propel movement via back to back radio in continuous contact with the driver until the second train has arrived to attach to the first train. Upon arrival the FOC shunter shall couple the second train with the first train.

The locomotive from the second train, situated at the north end of the Yard, shall be detached by the FOC shunter. The locomotive run round shall be completed to the same method as the first train. This locomotive shall attach to south end of the train, once both trains have been joined together.

For a train portion arriving into the Yard from the north, a locomotive run round shall not be required.

Trains may be formed with a locomotive positioned in the middle of the train. In this scenario both inbound services shall arrive on the same Reception Line.

A thick vertical line denotes new or amended items

AMENDMENTS TO OPERATING PUBLICATIONS – Continued**NOTICES & AMENDMENTS BY LINE OF ROUTE CODE****MD101 EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE)****SPECIAL TEMPORARY INSTRUCTIONS RELATING TO EUSTON HS2
BETWEEN EUSTON STATION AND WEMBLEY/ WILLESDEN
UNTIL FURTHER NOTICE**

The following instructions for Signallers and the GB Railfreight Person In Charge (GBRf PIC) apply:

Working in to HS2 Works Siding 1. Arrivals.

Prior to departure of a Materials by Rail train that is planned to travel to HS2 Work Siding 1 (Euston) from Wembley/Willesden or Kilburn Up & Down Goods Loop, the Wembley Mainline SCC Signaller must advise the GB Railfreight Person In Charge (GBRf PIC) of the reporting number of the train and request acceptance of the train.

Before accepting the train, the GBRf PIC must ensure that the Siding is clear of any staff or obstructions.

When satisfied the above requirements are met, the GBRf PIC must operate the Shunters Acceptance Release to the 'OFF' Position to accept the train and confirm that the train is accepted for arrival.

Once the GBRf PIC has given the appropriate Shunters Acceptance Release and the slot light is illuminated to the Signaller, the Wembley Main Line Signallers can enable the Material by Rail service to depart from the Wembley/Willesden stabling areas or Kilburn Up & Down Goods Loop for London Euston HS2 Siding 1.

When the HS2 Materials By Rail Train has arrived into the HS2 Works Siding 1 the GBRf PIC must return the Shunters Acceptance Release to the 'ON' position. The PIC will provide the driver of the arriving train with a walkie-talkie radio.

When the HS2 Materials By Rail Train has arrived on the HS2 Works Siding 1, the Leading Locomotive into Euston must be shut down as soon as practicable to reduce noise and air pollution within the station. GBRf staff will apply the relevant train handbrakes to formally secure the train.

Once the train is secured, a Network Rail COSS will place 'NOT to be MOVED' boards on each locomotive cab end. The Network Rail COSS will then contact Wembley Mainline SCC Euston Panel signaller to request a Possession of Sidings for WS1. Once granted, work may commence to load the train. The GBRf PIC will then follow the pre-agreed Method of Work in conjunction with the Sidings Possession.

Departures. All HS2 Materials By Rail Trains must be ready to depart 15 minutes before the booked departure time. Once the loading operation has been completed, the Network Rail COSS will contact Wembley Mainline SCC Euston Panel signaller to hand back/cancel the Possession of Sidings for WS1. The COSS will arrange for the removal of the 'NOT to be MOVED' boards from each locomotive cab end. WEED SPRAYING TRAINS IN OPERATION**FROM MONDAY 9 MARCH 2026 UNTIL MONDAY 31 AUGUST 2026**

In 2026 multi-purpose vehicles (MPVs) and Envu (previously Bayer) trains will be delivering the national train-borne weed spray programme.

If any staff are on or near the line when a Weed Control Train approaches, they should take the following action:

- On the approach of the Weed Control Train staff must acknowledge and move to a position of safety
- Remain in the position of safety; **Make themselves visible** to the Weed Control Train. If the spray operators can see anyone who is working in the vicinity, they will suspend spraying as they pass the site.
- Staff should not 'hide' behind bushes in an attempt to avoid being sprayed. In such cases the spray operators may not see staff and the spray jets are specifically designed to penetrate bushes.

The herbicides deployed by the Weed Control Train are biodegradable, non-irritant and non-harmful at the low concentrations used. In the unlikely event that staff are sprayed accidentally it is recommended that they take the following actions:

- If the eyes have been sprayed, rinse immediately with clean, water for 15 minutes and obtain medical aid if any discomfort is felt thereafter.
- Rinse any exposed skin with clean water and wash with soap and water afterwards.
- Avoid eating, drinking, or smoking until this procedure has been carried out.
- Change any sprayed clothing at the earliest convenient time and retain in a plastic bag for collection.
- Report the incident to the Route Operations Control.
- Should any member of staff be sprayed they may obtain advice from SCO 24:7 Seasonal Controller 01908 723500 (Option 8)
- If you have any medical concerns, please call the non-emergency NHS number – 111.

Should any member of staff require any further information or advice please contact:
