GENERAL REMARKS

ECDP - W2H Project

Non-disruptive Network test log investigation/ York ROC ECML(S) 'B' Leg only from York ROC under TS11.

York ROC ECML(S) ?A Network? will remain fully operational throughout, When the 'B Network' is down so as not to affect the functioning of the workstations/ York ROC.

No wheels free or wheels static required. TS11 / planned works are non-disruptive to all others, and will not affect any train movements, possessions, engineering works.

ECML Mileage: 00m 00ch (ECM1) - 32m 40ch (ECM5)

Additional mileages:

HDB: 05m 07ch to 28m 01ch

MEB: 00m 00ch to 03m 37ch

CFP: 03m 20ch to 04m 33ch

CBI: 00m 30ch to 00m 53ch

CRF1:00m 00ch to 00m 20ch

HPW: 00m 03ch to 00m 14h

SBR: 32m 11ch to 46m 00ch

DCF: 32m 53ch to 34m 05ch

GENERAL REMARKS

ECDP - W2H Project

Non-disruptive Network test log investigation/ York ROC ECML(S) 'B' Leg only from York ROC under TS11.

York ROC ECML(S) ?A Network? will remain fully operational throughout, When the 'B Network' is down so as not to affect the functioning of the workstations/ York ROC.

No wheels free or wheels static required. TS11 / planned works are non-disruptive to all others, and will not affect any train movements, possessions, engineering works.

ECML Mileage: 00m 00ch (ECM1) - 32m 40ch (ECM5)

Additional mileages:

HDB: 05m 07ch to 28m 01ch

MEB: 00m 00ch to 03m 37ch

CFP: 03m 20ch to 04m 33ch

Points WM2330 A&B, WM2331 A&B, WM2332 A&B and WM2333 A&B, a ladder between TMD Loop and Down Fast at Willesden South Jn, have been renewed. The maximum lateral displacement is for points WM2330A which has been renewed 6 metres (7 yards) closer to Euston.

Signal WM127 on the Down Fast has had its outer overspeed sensor relocated to 800 metres (875 yards) on approach.

Signal WM331 on the Down Slow as had its overspeed sensor relocated to 425 metres (465 yards) on approach. The signal has a white diamond sign mounted below the position light.

Ground position light signal WM1177 on the Up Fast (Down direction) has been renewed approximately 8 metres (9 yards) towards Euston, with a modern type of Mallatite route indicators.

Ground position light signal WM1179 on the Up Slow (Down direction) has been renewed approximately 10 metres (11 yards) towards Euston, with a modern type of Mallatite route indicators.

Please see section D, where the table A diagram has been amended to add Willesden South Jn name.

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE

EA1310 CAMDEN ROAD WEST JUNCTION TO RICHMOND

ACTON WELLS EAST JUNCTION

OHL wire runs have been extended from the North London Lines onto the Poplars between 0m 39ch AWL to 0m 50ch AWL.

(D23012) (03/11/2025) (UFN)

EA1380 FENCHURCH STREET TO SHOEBURYNESS

BETWEEN SHADWELL & LIMEHOUSE

FROM FRIDAY 03 APRIL 2026 TO TUESDAY 07 APRIL 2026

From 03/04/2026 – 07/04/2026 the DLR will be undertaking Track Renewal work on its East Bound Lines between Shadwell and Limehouse, adjacent to Network Rail's FSS1 Lines at approximately 1m 207y – 1m 972y. The DLR will be undertaking a complete track renewal of their East Bound lines. The works are planned to be undertaken under full possession of the railway line.

This work may be a source of distraction for drivers, so advanced notice is being provided.

Justification for publication if required (see section D submission guide):

Other information should be included here that will assist in the production of the notice:

(D23642) (03/04/2026) (4)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued**EA1380 FENCHURCH STREET TO SHOEBURYNESS – Continued****CHALKWELL STATION****FROM 16 FEBRUARY 2026 UNTIL 3 JANUARY 2027**

As part of the ongoing footbridge replacement works at Chalkwell station (33m 69ch), a temporary scaffold constructed footbridge will be erected over both running lines to maintain access. The existing footbridge will then be demolished and replaced with a new structure.

Train drivers should be aware of the potential distraction caused by the presence of the temporary footbridge and associated works at this location.

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE

SO250 BATTERSEA PIER JUNCTION TO WILLESDEN WEST LONDON JUNCTION

**BETWEEN BATTERSEA PIER JUNCTION AND LATCHMERE JUNCTION
FROM 0005 HOURS SATURDAY 7 FEBRUARY UNTIL 31 DECEMBER 2027**

Since 2024 on ongoing into 2027 the Victoria Area Phase 5 Re-signalling Project (Stewarts Lane, Longhedge Junction, Loughborough Junction, Nunhead, Ravensbourne, Herne Hill, Penge East area) continues undertaking civil and signal engineering installation works as below:

- installation of signal, location cases and Removeable Equipment Building (REB) foundations and buildings.
- Erection of signal structures and signal heads, including 4 foot equipment such as AWS, TPWS, Axle counter equipment, (Signal heads to remain covered and AWS cover plates to be fitted until commissioned)
- installation of speed indicators (to remain covered up until commissioned)
- Associated permanent way work.

(D23430) (07/02/2026) (14)

SO500 VICTORIA TO BRIGHTON

GATWICK AIRPORT STATION

The Gatwick Station Project is entering its final phase of construction works and the next phase of the project involves commissioning into use the permanent lighting fittings on Platforms 5, 6 and 7.

The current platform lighting in the central section of the abovementioned platforms remain temporary fittings affixed to hoardings. From Monday 11th September 2023 (Week 24) this central section of lighting shall be changed over to its permanent light fittings. All lighting changeovers shall be fully tested prior to changeover.

This is to ensure minimum lux levels and lighting uniformity is achieved and verified by GTR test trains prior to enacting changeover. Whilst this activity shall not impact or affect the operational railway, operational staff based at and passing through the station may observe that lighting positions on the platform have changed so prior notice is being provided.

(D/5342 – D20723) (11/09/2023) (UFN)

HORLEY STATION

FROM 2345 SATURDAY 11 OCTOBER 2025

As part of the upcoming refurbishment works planned at the Horley Station Footbridge, which connects the station to all platforms, and spanning all lines, will have scaffolding erected above the platform to support these works.

As drivers pass through this location, they will see the presence of this scaffolding and contractors working overhead.

The presence of this scaffolding and refurbishment works may be a source of distraction to drivers, so this notice is being provided to alert them of this change in the surroundings as they pass through this location.

Hard copy Sectional Appendix page 24D

Explanation of change: Add a second row in the table for Proof House Jn; misrouting to Snow Hill workstation
Amend the whole instruction to read as follows:

TW5 SECTION 25 – KNOWN MISROUTED CALL LOCATIONS

The locations in the table below are known areas where calls are frequently misrouted to the wrong signaller. Calls may misroute to the wrong signaller if the 'contact signaller' button is pressed.

Drivers must carry out the 'Pending Registration' process on the radio and continue their journey.

Location	Fault Number	Comments	Outcome
Washwood Heath	FMS BCA647195	GSM-R calls from Washwood Heath location misrouting to Birmingham ROC Proof House Workstation instead of Washwood Heath Workstation.	CT7 Plates Requested
Proof House Jn	FMS 1104917	GSM-R calls from Proof House Jn / New Street South Tunnel misrouting to Birmingham ROC Snow Hill workstation instead of New Street Workstation.	Currently awaiting feedback

GSM-R FAULTS AND FAILURES RESPONSE

VERSION 1.1

PURPOSE

To provide guidance on the response to onboard GSM-R system faults and local/area infrastructure faults.

Appendix covers the response to system faults from a single fixed terminal through to failures of the infrastructure resulting in loss of coverage in a geographical area.

APPENDIX

This chart details the process used by Network Rail Control to determine the operating response to GSM-R service or sub-system failures.

(D17773) (20/03/2021) (UFN)

MODULE LNWS(S) 2 LOCAL INSTRUCTIONS

Hard copy Sectional Appendix pages 255-255A

Explanation of change: Add a second row in the table for Proof House Jn; misrouting to Snow Hill workstation

Amend the section 'Forming of trains on Reception lines' to read as follows:

MD137 - HARLESDEN JN TO WEMBLEY CENTRAL (WEMBLEY YARD LINES)**Wembley Yard / Wembley European Freight Operating Centre (WEFOC)**

'Jumbo' services shall be formed by two or more individual trains that shall arrive into the Reception lines at differing times. These trains are to be combined into one, prior to departing towards Willesden South Jn.

Prior to a train arrival, the FOC shunter shall contact the Signaller and reach a clear understanding of any train movements that are required to form multiple train portions together.

South end arrivals: The first arrival shall arrive on an available Reception Line. The locomotive shall be detached by the FOC shunter. The Signaller shall clear both WM793 Signal and WY115 Signal with the opposing locking arrangement on request towards the Shunt Neck, L or M Loco Sidings. The locomotive shall arrive behind WY115 Ground Position Signal (GPS) and not enter the siding. Alternatively, the Signaller may route the locomotive onto the Up Slow to arrive behind WM338 Signal. The locomotive run round shall be completed, with the locomotive attaching to the south end of the train.

The second train shall arrive on an available Reception Line adjacent to the first train. The FOC shunter shall depart the first train towards the south arriving the rear of train behind the Ground Position Signal (GPS) pre-agreed with the Signaller (WY158, WY160, WY184 or WY186). The FOC shunter shall contact the Signaller and confirm to the driver that the GPS has cleared towards the correct Reception Line to which the second train is stabled on. The FOC shunter shall control the propel movement via back to back radio in continuous contact with the driver until the second train has arrived to attach to the first train. Upon arrival the FOC shunter shall couple the second train with the first train.

The locomotive from the second train, situated at the north end of the Yard, shall be detached by the FOC shunter. The locomotive run round shall be completed to the same method as the first train. This locomotive shall attach to south end of the train, once both trains have been joined together.

For a train portion arriving into the Yard from the north, a locomotive run round shall not be required.

Trains may be formed with a locomotive positioned in the middle of the train. In this scenario both inbound services shall arrive on the same Reception Line.

AMENDMENTS TO OPERATING PUBLICATIONS – Continued
NETWORK RAIL LONDON NORTH WESTERN SOUTH ROUTE SECTIONAL APPENDIX
DATED 02 DECEMBER 2006 – Continued

MODULE LNW(S) 2 LOCAL INSTRUCTIONS – Continued

****** Hard Copy Sectional Appendix: Pages 294 & 295

Explanation of Change: Change the fourth sub-section title to : Hereford Sidings 1,2 & 3 (GWR). Add a new first sentence to this section. Add four bullet points, to group together instructions for Drivers.

MD900 – ABBOTSWOOD JN TO STOKE WORKS JN VIA WORCESTER SHRUB HILL

Worcester Shrub Hill

North Sidings ground frame. The signaller must be advised of the movements required to be made using this ground frame. A Person in Charge of movements (PiC) must be appointed who must be specially trained in the use of the ground frame. The PiC must be in attendance in good time and before trains approach from the Norton Junction direction. Provided the signaller is in a position to grant permission, a release will be given for the interlocking lever.

After the points have been restored to the correct position, the PiC must not leave the ground frame until an assurance has been received from the signaller that everything is in order.

Shunting movements – station area. The following is the preferred shunting route that will be used where more than one route is available. Where only one shunting route is available, or where due to the nature of the location, liaison between the signaller and the driver always precedes any movement, no preferred shunting route is listed.

Location	Shunt details
Norton Junction end	To Up Main line and reverse behind shunting signal SH54.

All shunting movements between the station and the Hereford / Back Road Sidings involving HSTs must be made using one engine only with the Oxford end power car shut down. All GWR train movements into and out of the Hereford Sidings must be made via the Norton Junction end using the North Sidings Ground Frame.

Back Road Siding (Bay Siding). Movements to and from the Back Road Siding are fully signalled and are under the control of the signaller. Drivers must telephone the signaller for permission to make any movement towards the exit ground disc signal.

The Tunnel Junction end of the siding is provided with electrical shore supply connections for use when HST sets are being stabled.

Hereford Sidings 1, 2 & 3 (GWR). Signallers permission must be obtained, for any movement to commence in the Hereford sidings before the ground frame is requested by the PiC. A PiC must be appointed whenever moves are required to, within or from these sidings. This person must contact the signaller when starting and finishing duty and provide a contact telephone number. The PiC will be responsible for the operation of the North Sidings Ground Frame.

- Drivers wishing to undertake train preparation duties must telephone the signaller on arrival to agree suitable protection arrangements and obtain permission to start work. The signaller must record the name of the driver together with a mobile telephone contact number. The signaller must inform the driver if a PiC is already on duty.
- Drivers must inform signallers when train preparation duties are complete. No other movements must be permitted towards, within or from the Hereford sidings until train preparation duties are complete.
- Drivers must obtain permission before making any movement towards the exit ground disc signal at the Norton Junction end of the layout.
- The Tunnel Junction end of sidings 1 and 3 are provided with electrical shore supply connections. Drivers of down direction HST movements must bring their train to a stand at the shore supply stop boards provided.

No other movements are permitted in the Hereford Sidings whilst GWR HST services are being stabled or prepared for service.

No. 2 Hereford Siding will be protected by the signaller when drivers are undertaking train preparation duties on roads 1 and / or 3.

Under normal circumstances no other movements will be permitted or planned over no. 2 Hereford Siding between the hours of 04.00 and 06.30 daily.

Signallers will not release control of the ground frame until such time as they are advised that all GWR train preparation duties are complete and all GWR staff are clear of the Hereford sidings

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE

MD101 EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE)

SPECIAL TEMPORARY INSTRUCTIONS RELATING TO EUSTON HS2 BETWEEN EUSTON STATION AND WEMBLEY/ WILLESDEN UNTIL FURTHER NOTICE

The following instructions for Signallers and the GB Railfreight Person In Charge (GBRf PIC) apply:

Working in to HS2 Works Siding 1. Arrivals.

Prior to departure of a Materials by Rail train that is planned to travel to HS2 Work Siding 1 (Euston) from Wembley/Willesden or Kilburn Up & Down Goods Loop, the Wembley Mainline SCC Signaller must advise the GB Railfreight Person In Charge (GBRf PIC) of the reporting number of the train and request acceptance of the train.

Before accepting the train, the GBRf PIC must ensure that the Siding is clear of any staff or obstructions.

When satisfied the above requirements are met, the GBRf PIC must operate the Shunters Acceptance Release to the 'OFF' Position to accept the train and confirm that the train is accepted for arrival.

Once the GBRf PIC has given the appropriate Shunters Acceptance Release and the slot light is illuminated to the Signaller, the Wembley Main Line Signallers can enable the Material by Rail service to depart from the Wembley/Willesden stabling areas or Kilburn Up & Down Goods Loop for London Euston HS2 Siding 1.

When the HS2 Materials By Rail Train has arrived into the HS2 Works Siding 1 the GBRf PIC must return the Shunters Acceptance Release to the 'ON' position. The PIC will provide the driver of the arriving train with a walkie-talkie radio.

When the HS2 Materials By Rail Train has arrived on the HS2 Works Siding 1, the Leading Locomotive into Euston must be shut down as soon as practicable to reduce noise and air pollution within the station. GBRf staff will apply the relevant train handbrakes to formally secure the train.

Once the train is secured, a Network Rail COSS will place 'NOT to be MOVED' boards on each locomotive cab end. The Network Rail COSS will then contact Wembley Mainline SCC Euston Panel signaller to request a Possession of Sidings for WS1. Once granted, work may commence to load the train. The GBRf PIC will then follow the pre-agreed Method of Work in conjunction with the Sidings Possession.

Departures. All HS2 Materials By Rail Trains must be ready to depart 15 minutes before the booked departure time. Once the loading operation has been completed, the Network Rail COSS will contact Wembley Mainline SCC Euston Panel signaller to hand back/cancel the Possession of Sidings for WS1. The COSS will arrange for the removal of the 'NOT to be MOVED' boards from each locomotive cab end. The GBRf PIC will contact the Wembley Main Line Euston Panel Signaller when the HS2 Materials By Rail Train is ready to depart to advise of; the train reporting number; that the driver is onboard ready to depart; and any other relevant details. The Wembley Main Line Signaller will interpose the Train Reporting Number In the appropriate Train Descriptor berth.

Before setting the route for the train to depart from HS2 Siding 1, the Wembley Main Line Euston Panel Signaller must advise the Wembley Main Line Willesden Panel Signaller that there is a HS2 Materials By Rail Train ready to depart for Wembley/Willesden stabling areas and confirm it can be accepted.

(D23478) (14/02/2026) (12R)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued**MD101 EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE) – Continued****BETWEEN WEST LONDON JN (WILLESDEN) AND WILLESDEN NORTH JN
UNTIL 1200 HOURS SUNDAY 17 MAY 2026**

Various plant will be stored in the wide way between the Down Slow and Up Fast around 5m 42ch. This is marked in red rectangle, with text for orientation:

(D23611) (14/03/2026) (7)

**WATFORD TUNNELS
UNTIL FURTHER NOTICE**

Drivers should be aware Remote Earthwork Monitoring equipment will be installed to the low mileage end of Watford Tunnels. The system will include visible tilt sensors, cameras and solar panels mounted on metal posts.

(D18671) (23/10/2021) (14R)

**APSLEY STATION
UNTIL THURSDAY 31 DECEMBER 2026****Apsley platforms 1 and 2 (Fast lines) temporarily reduced in length
Apsley platforms 3 and 4 (Slow lines) temporarily reduced in length**

In connection with the ongoing AFA Scheme works until December 2026 Apsley Station (all 4 platforms) are reduced in length and a temporary hoarding will be in place to demarcate this area.

Platform 1 is reduced by 120 metres (132 yards) at the London end leaving 88 metres (96 yards) of operational platform. Two UDS 8 boards have been removed and replaced with UDS 4 boards. An S car board is already installed and will remain in-situ unchanged.

Platform 2 is reduced by 125 metres (137 yards) at the London end leaving 88 metres (96 yards) of operational platform. All existing stop car signs have been covered up and a new S car board & 2 UDS 4 boards have been installed at the 86 metre mark.

Platform 3 is reduced by 155 metres (170 yards) at London end leaving 88 metres (96 yards) of operational platform. The existing 9/12 stop car sign marker has been removed and replaced with a S car board and two UDS 4 boards installed in the same location.

Platform 4 is reduced by 142 metres (156 yards) at the London end leaving 103 metres (113 yards) of operational platform. All existing stop car signs are covered up and a new S car board and two UDS 4 boards are installed at 101m mark.

(D23588) (07/03/2026) (18R)

**BLETCHLEY FREIGHT SIDINGS
UNTIL MONDAY 15 SEPTEMBER 2026**

Bletchley Freight Sidings 9, 10 and 11 ownership has been changed for a set period, they are private sidings from Wednesday 23 April 2025. This is under reference STNC/G1/2025/NWC/965 expiring 15 September 2026. After 15 September 2026 the sidings revert to network sidings.

MODULE KSW3 LOCAL INSTRUCTIONS

Hard Copy Sectional Appendix: Page 229

Explanation of Change: Alterations to a local instruction are required to reflect changes in rolling stock and local conventions

AMEND local instruction shown on hard copy page 229 to read as below.

SW105 CLAPHAM JUNCTION TO WEYMOUTH

Durnsford Road Staff Halt

Staff using this halt must travel by only those trains shown in the Working Timetables to stop, or specially authorised by Network Rail Control, and must ensure that the train will run on the Up Fast after departing Wimbledon. If the train must be diverted to the Up Slow, no stop will be made.

Trains must stop with the leading cab at the London end of the platform and staff wishing to alight must travel in the front two compartments of the leading coach.

Trains formed of Class 158, 159 or 458 stock

On departure from Wimbledon, staff wishing to alight at the staff halt must travel in the Vestibule behind the leading driving cab. On arrival at the staff halt, staff must only board and alight through the local crew access door. This door must be operated by the Driver.

Trains formed of class 444, 450 or 701 stock.

On departure from Wimbledon, staff wishing to alight at the staff halt must travel in the passenger accommodation immediately behind the leading driving cab. On arrival at the staff halt where a Guard is provided, the Guard must open the leading set of 'passenger doors', (immediately behind the Driver) under local control. Staff must only join and alight from this door. When it is safe to do so, the Guard must close the door and give the 'ready to start' signal to the Driver.

Where a train is Driver-only operated (ECS), staff wishing to board or alight will only be able to do so via the driver's cab door.

Empty trains

Drivers of all empty coaching stock requiring to set back into the depot from position light signal W1107 at the Staff Halt on the Up Fast must immediately telephone the Signaller if W158 signal is at danger.

Class 458 units

Movements towards Wimbledon Park Depot formed of Class 458 units must be made via the Up Slow at Wimbledon station and then via 725 points to No.1 Up siding. Drivers of such trains must inform the Signaller of the formation when approaching Wimbledon station.

AMENDMENTS TO OPERATING PUBLICATIONS – Continued**NOTICES & AMENDMENTS BY LINE OF ROUTE CODE****SW210 CLAPHAM JUNCTION TO READING****WANDSWORTH TOWN****FROM MONDAY 30 MARCH 2026 TO SATURDAY 03 JULY 2027**

Train Crews and other staff should be aware of the work taking place at Wandsworth Town Station.

As part of the access for all (AFA) works, temporary hoarding will be placed on platforms 2 (Down Windsor Fast) and 3 (Up Windsor Fast) narrowing the width of the platform in places. In addition, at the country end of the station a temporary scaffold bridge will be constructed that will span the UP Windsor Fast and Slow lines. This will be used by passengers to access platform 4 from Platform 3, due to the closure of the platform 4 staircase.

(D23665) (30/03/2026) (13)

WEED SPRAYING TRAINS IN OPERATION**FROM MONDAY 9 MARCH 2026 UNTIL MONDAY 31 AUGUST 2026**

In 2026 multi-purpose vehicles (MPVs) and Envu (previously Bayer) trains will be delivering the national train-borne weed spray programme.

If any staff are on or near the line when a Weed Control Train approaches, they should take the following action:

- On the approach of the Weed Control Train staff must acknowledge and move to a position of safety
- Remain in the position of safety; **Make themselves visible** to the Weed Control Train. If the spray operators can see anyone who is working in the vicinity, they will suspend spraying as they pass the site.
- Staff should not 'hide' behind bushes in an attempt to avoid being sprayed. In such cases the spray operators may not see staff and the spray jets are specifically designed to penetrate bushes.

The herbicides deployed by the Weed Control Train are biodegradable, non-irritant and non-harmful at the low concentrations used. In the unlikely event that staff are sprayed accidentally it is recommended that they take the following actions:

- If the eyes have been sprayed, rinse immediately with clean, water for 15 minutes and obtain medical aid if any discomfort is felt thereafter.
- Rinse any exposed skin with clean water and wash with soap and water afterwards.
- Avoid eating, drinking, or smoking until this procedure has been carried out.
- Change any sprayed clothing at the earliest convenient time and retain in a plastic bag for collection.
- Report the incident to the Route Operations Control.
- Should any member of staff be sprayed they may obtain advice from SCO 24:7 Seasonal Controller 01908 723500 (Option 8)
- If you have any medical concerns, please call the non-emergency NHS number – 111.

Should any member of staff require any further information or advice please contact:

SCO 24:7 Seasonal Controller 01908 723500 (Option 8)

(D23607) (21/03/2026) (22)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued**SECTIONAL APPENDIX FEEDBACK (SAF) FORM QR CODE**

The Sectional Appendix Feedback (SAF) Form is designed for reporting anomalies in the National Electronic Sectional Appendix (NESA), paper copy Sectional Appendices, or other format (e.g. PDF file) Sectional Appendices.

It provides a structured way to log, investigate, and resolve errors. Examples may include:

- Differences between what is published in NESA and in the corresponding paper copy Sectional Appendix
- Differences between what is published and what is provided on the network (e.g. speed change commencing at a different mileage, platform lengths longer or shorter than what is published).

If the QR code is not working, please use this link here to access the form:

networkrail-networkcapabilityupdatetool.oncreate.app/w/webpage/141GBPTP1

When to use Rail Notices

<https://www.railnotices.net/CommonInterface/Default.aspx>

Use Rail Notices for planned changes to infrastructure. Examples:

- New or altered infrastructure (e.g. junction renewals, changes to signals, electrification, line speed changes).
- Permanent withdrawal of capability (e.g. plain-lining, temporary speed restriction converted to a permanent speed restriction).

REMEMBER that any proposed changes to infrastructure capability, track layout, speeds, etc. MUST first be established through industry consultation via the Network Change process.

If you are unsure of which is the appropriate process to use, then please use this Sectional Appendix Feedback Form and a WON Approver will be in touch to provide further guidance.

(D23663) (28/03/2026) (03)

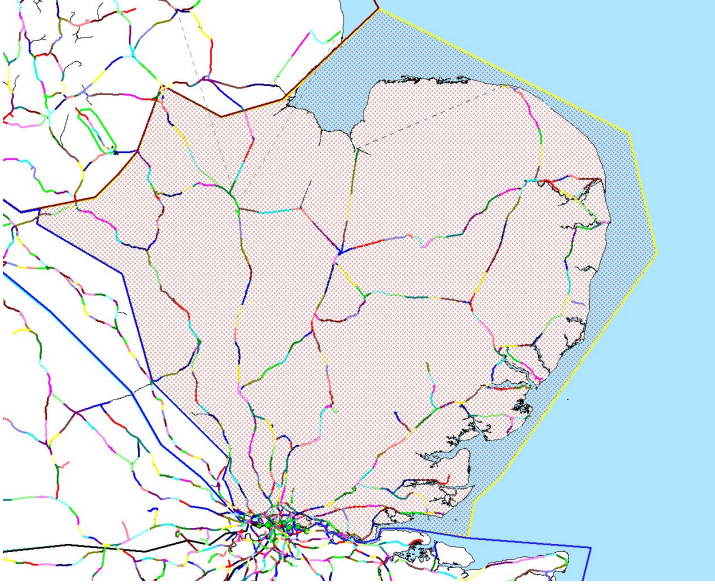

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued**MISCELLANEOUS INSTRUCTIONS****REPLACEMENT OF DOO STATION EQUIPMENT AT KENT ROUTE STATIONS****FROM WEDNESDAY 01 MAY 2024 UNTIL WEDNESDAY 01 MAY 2028*******PLEASE NOTE THE END DATE HAS BEEN EXTENDED SINCE FIRST PUBLISHED*****

Driver Only Operation (DOO) equipment is gradually being replaced. The work mainly entails replacement of monitors and occasionally metalwork such as camera housings and monitor housings with new units at Kent route stations

Work will be undertaken between trains booked to call, or during white periods overnight.

Any queries should be directed to either Darren Goodall, or Doug Mackenzie – NR DOO Section Managers Kent.

(D/5341 – D20688) (27/04/2024) (UFN)

WEEDSPRAYING TRAINS IN OPERATION**FROM MONDAY 9 MARCH 2026 UNTIL MONDAY 31 AUGUST 2026**

In 2026 multi-purpose vehicles (MPVs) and Envu (previously Bayer) trains will be delivering the national train-borne weed spray programme.

If any staff are on or near the line when a Weed Control Train approaches, they should take the following action:

- On the approach of the Weed Control Train staff must acknowledge and move to a position of safety
- Remain in the position of safety; **Make themselves visible** to the Weed Control Train. If the spray operators can see anyone who is working in the vicinity, they will suspend spraying as they pass the site.
- Staff should not 'hide' behind bushes in an attempt to avoid being sprayed. In such cases the spray operators may not see staff and the spray jets are specifically designed to penetrate bushes.

The herbicides deployed by the Weed Control Train are biodegradable, non-irritant and non-harmful at the low concentrations used. In the unlikely event that staff are sprayed accidentally it is recommended that they take the following actions:

1. If the eyes have been sprayed, rinse immediately with clean, water for 15 minutes and obtain medical aid if any discomfort is felt thereafter.
2. Rinse any exposed skin with clean water and wash with soap and water afterwards.
3. Avoid eating, drinking, or smoking until this procedure has been carried out.
4. Change any sprayed clothing at the earliest convenient time and retain in a plastic bag for collection.
5. Report the incident to the Route Operations Control.
6. Should any member of staff be sprayed they may obtain advice from SCO 24:7 Seasonal Controller 01908 723500 (Option 8)
7. If you have any medical concerns, please call the non-emergency NHS number – 111.

Should any member of staff require any further information or advice please contact:

SCO 24:7 Seasonal Controller 01908 723500 (Option 8)

(D23607) (21/03/2026) (22)

Explanation of Change: Signal YB1303/K65 has had additional events

(D23628) (21/03/2026) (RSSB) (UFN)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

**** Items marked thus will not appear in future issues and a note must be taken of them by all concerned**
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued**MISCELLANEOUS INSTRUCTIONS****CLASS 153 VEHICLES FITTED WITH SANDING EQUIPMENT – (THIS NOTICE APPLIES TO THE LNW(S) ROUTE ONLY)**

Class 153 rolling stock are fitted with sanding equipment which the Driver will operate when it is necessary to stop the train in emergency, and / or during experienced conditions of very low railhead adhesion.

Each driving cab is fitted with the ability to supply sand which can be discharged and laid by the following methods:

- sand application manually operated during Brake Step 3;
- sand application automatically delivered during Emergency Braking; and
- sand application manually operated during Traction (e.g. train acceleration)

The application of sand by any of the above methods does not require the train to be removed from passenger operation / service, unless otherwise in circumstances advised by the Driver.

Driver's Actions

When the manual sanding equipment has been used at a speed below 10mph under braking conditions, the train must be brought to a stand and the Driver must inform the Signaller immediately and report the following:

- a) that the manual sanding equipment has been operated; and
- b) the location where the equipment was discharged and the current location of the train

If the Signaller cannot be contacted immediately via the signal post telephone, GSM-R radio, the Driver must place a track circuit operating clip on the line immediately in front of the train. To avoid delay, if the Driver alights to use a signal post telephone, a track circuit operating clip should be taken as well.

The Signaller may instruct the Driver to place a track circuit operating clip on the line immediately in front of the train.

When the Signaller confirms that the train has been protected, the Driver must provide the following additional information:

- R1. why the equipment was operated i.e. whether for a genuine emergency, system fault or operated in error
- R2. the location of poor railhead adhesion (where applicable) which required the sander to be operated; and
- R3. the units and vehicle number on which the sander was operated

When the train is ready to proceed, the Driver must obtain the Signaller's authorisation before moving the train. When a track circuit operating clip has been used, the Signaller's permission must be received before removing it from the line.

Signallers Actions

On receipt of a report from a Driver that the emergency sanding equipment has been operated on a unit, the Signaller must immediately:

- place or maintain the signal in rear of the train at Danger; and
- advise the Driver when the train is protected and record the information provided (on Bi-directional lines, protection must also be applied to prevent the approach of trains in both directions)

When it has been ascertained from the Driver that the train is able to proceed, movements may re-commence. Where applicable, the Signaller must instruct the Driver to remove the track circuit operating clip prior to the train proceeding. The next controlled signal in rear of where the sander was operated must be maintained at Danger behind the first train to proceed through the affected section, until the train has passed clear of the overlap of the signal in advance of where the train stopped and occupied the track circuit ahead. The passage of this first train must be observed to ensure that track circuits work correctly. This method of signalling shall continue until it has been ascertained that the track circuits are working correctly.

Where poor railhead adhesion problems have been reported, the Signaller must also observe Rule Book, Module TW1 – Preparation and movement of trains – General, Section 28 – Rail Adhesion.

The Signaller must inform Network Rail Control giving details of the unit and vehicle numbers, train running details, time and location of the incident and ensure that all details are recorded (train register / occurrence book) and complete a failure to operate track circuit form if applicable.

(D14229) (08/05/2021) (16R)

**USE OF GSM-R TO ADVISE DRIVERS OF AN APPROACHING
 TSR DUE TO A HIGH OUTPUT WORKSITE ON THE ADJACENT LINE -
 (THIS NOTICE APPLIES TO THE LNW(N) & LNW(S) ROUTES ONLY)**

GSM-R berth triggered messages will be used to pass information to Drivers where TSRs are used when the adjacent line is a live worksite.

TSR boards will be used with the berth triggered broadcast acting as a supplementary message only.

(D14255) (30/06/2018) (UFN)

DISCONNECTION NOTICE

**

DISCONNECTION SUMMARY			
Start date	15/04/2026	Start time	01:00
Finish date	15/04/2026	Finish time	05:00
Site contacts	BASIL MATHEW	Phone numbers	07354532946
Location	Peterborough PETC GSM-R BSC04		

Purpose of disconnection / Nature of work to be carried out

Emergency work to be done on the GSMR BSC network which will cause 2-hour outage to GSMR calls. Outage will be 2 hours between 01:00 and 05:00 Hrs. There will be no outage prior to 01:00Hrs
 Reason/Justification:
 All BTS and the BSC require to be restarted before reaching 994 days uptime. A controlled restart is done to prevent restarts occurring during normal operating hours.

Suggested action: Try to re-establish the call once the work is complete

The shaded area shows the impacted area:

Impact The below cells will drop any calls in progress and GSMR service will be unavailable during reset between 01:00am to 05:00am.
