**Stabling of trains**

**Explanation of Change:** EA1325 (Platforms 1 & 2) to list of approved locations for Stabling of Trains

When stabled on a running line during darkness or other conditions of poor visibility the person in charge must place a red light at the end(s) of the train to face any movement that may approach on the same line.

Trains must not be stabled on running lines, except:

- On platform lines at terminal stations
- On dead end bay platforms at through stations
- At the following locations shown below

**EA1325 Highbury and Islington – Dalston West Curve**

Highbury and Islington Platform 1 – Terminal Platform

Highbury and Islington Platform 2

**Route Clearance**

Before any rolling stock operates on the East London Line Core Route, approval shall be obtained from the London Overground Assurance Board.

**FAILURE OF GSM-R FIXED INFRASTRUCTURE EQUIPMENT**

**Between Whitechapel Station and the Transport for London/Network Rail boundary at Dalston Junction and South of Surrey Quays Station**

**Driver awareness**

In the event of a failure of the GSM-R fixed infrastructure equipment preventing driver to signaller communication and/or vice-versa, trains may continue to operate normally over any affected line until the close of service the same day.

Where there would be no train available to examine the line on an adjacent line in the event that a train became an unusually long time in section, the signaller will request Operations Control to arrange for the train concerned to be accompanied by a Competent Person before it is permitted to proceed.

(Item Continued on Next Page)

**SECTION D – GENERAL INSTRUCTIONS AND NOTICES**

\*\* Items marked thus will not appear in future issues and a note must be taken of them by all concerned

A thick vertical line denotes new or amended items

**AMENDMENTS TO OPERATING PUBLICATIONS – Continued**

**DATED 05 DECEMBER 2009 – Continued**

**MODULE KSW3 LOCAL INSTRUCTIONS – Continued**

**SO511 – Highbury & Islington to New Cross / New Cross Gate (ELL) – Continued**

**Between Whitechapel Station and Surrey Quays Station**

**Driver awareness**

In the event of a failure of the GSM-R fixed infrastructure equipment preventing driver to signaller communication and/or vice-versa.

- Operations Control will arrange for sufficient Competent Persons to be made available to accompany the driver of each train over any affected line within two hours of the original failure occurring
- The Signaller will permit trains to continue to travel over any affected line without a Competent Person accompanying the driver of each train for a maximum period of two hours from the time the original failure occurred

The applicable arrangements above permitting trains to proceed over any affected line can continue to be applied until the close of service the same day.

**Exception**

The signaller must request Operations Control to arrange for the train concerned to be accompanied by a Competent Person before it is permitted to proceed if;

- The time has not been reached whereby a Competent Person is required to travel on each train, and
- R1. There would be no train available to examine the line on an adjacent line in the event that a train was an unusually long time in section

If the failure has not been rectified by the start of service the following day, the signaller must ensure that trains are not permitted to travel over any affected line.

**Dated: 23/05/2026**  
(D23761) (23/05/2026) (11)

**Hard Copy Sectional Appendix: 347**

**Explanation of Change:** Additional Instruction added if Driver is unable to contact Signaller. Instructions regarding Tunnel Lighting and Speed Restrictions added

**SO511 – Highbury & Islington to New Cross / New Cross Gate (ELL)**  
**SURREY QUAYS to SHOREDITCH HIGH STREET**

**Tunnel sections between Surrey Quays and Shoreditch High Street stations**

**Class 378 units**

**Failed trains able to contact the signaller**

If a train is declared a failure and the driver is able to contact the signaller, the following procedure will apply.

If the signaller establishes that a train has not moved and is able to establish contact with the train, the ELL Failed Train Procedure will apply.

The Rule Book, Module M2, is modified by the following instruction:

- R2. The driver of the assisting train will when required be authorised to enter the tunnel section without picking up the driver of the failed train,
- R3. The driver of the assisting train will not arrive at the assistance protection (not carried out),
- R4. The driver of the assisting train must travel at no more than 3mph whilst proceeding beyond the final signal/station location protecting the failed train,
- R5. The driver of the assisting train must stop 10m from the failed train, and
- R6. Once stopped 10m from the failed train, the driver of the assisting train must contact the signaller who will initiate a 3-way call via the GSM-R radio to arrange the coupling process.

**Failed trains able to contact the signaller**

If a train is declared a failure and the driver is unable to contact the signaller, the following procedure will apply.

If the driver of a failed train is unable to contact the signaller after three (3) attempts, they shall consider their train a failure and make their way to the rear driving cab of the failed train and await the arrival of an assisting train.

If the signaller establishes that a train has not moved and cannot establish contact with the train, the ELL Tunnel Rescue procedure will apply.

The Rule Book module, TS1 section 21, is superseded by the following instruction:

(Item Continued on Next Page)

**SECTION D – GENERAL INSTRUCTIONS AND NOTICES**

\*\* Items marked thus will not appear in future issues and a note must be taken of them by all concerned  
A thick vertical line denotes new or amended items

**AMENDMENTS TO OPERATING PUBLICATIONS – Continued**  
**NETWORK RAIL KENT/SUSSEX/WESSEX ROUTES SECTIONAL APPENDIX**  
**DATED 05 DECEMBER 2009 – Continued**

**MODULE KSW3 LOCAL INSTRUCTIONS – Continued**

**SO511 – HIGHBURY & ISLINGTON TO NEW CROSS / NEW CROSS GATE (ELL) – Continued**

- R1 Having failed to communicate with the signaller after 3 attempts, the driver of the failed train will make their way to the rear of their train and await the arrival of the assisting train.
- R2 Once stopped 10m from the failed train the driver of the assisting train exhibits their hazard warning lights indicating that they are ready to couple.
- R3 The driver of the failed train (who is in the rear cab) will, when ready, authorise the driver of the assisting train to couple to the failed train by exhibiting their hazard warning lights.
- R4 Confirmation of successful coupling will take place via the cab to cab facility.
- R5 Train movements will then continue in the normal direction subject to signal clearance as far as the next station where communication with the signaller must take place.

Tunnel lights arrangement

1. The tunnel high level lights are off by default
2. When traction current is switched off as a result of being discharged by either ECR or the headwall tunnel telephones, the lights will automatically switch to on state. When the current goes back to on state, the lights will switch to off state.
3. The lighting auto mode above can be overridden manually (for reasons such as emergency access, evacuation etc.) to be in either on or off state regardless of traction current's state. **Therefore, the tunnel lights MUST NOT be seen as an indicator of the traction current's state.**

Tunnel lights arrangement at crossovers at Canada Water and Shadwell

1. As instructed by RfL Operations, the default state of the lights is off state (regardless of the state of the tunnel lights or of the current traction). This also applies to possessions and during maintenance.
2. Lights are controlled and operated manually only, by IMC, when/if required during incident response or for maintenance/engineering works.

Tunnel light switches

Switches are provided in the tunnel headwall telephone cupboard at stations. They operate only the tunnel lights from the station at which the tunnel lighting switch was operated, to the midpoint between that station and the next station. Therefore, the lights must be switched on at the next station too if the whole tunnel section is required to be illuminated.

Speed restrictions

Due to limited space between Shoreditch High Street and Surrey Quays the placement of speed boards is amended as follows:

- The Termination board will be placed on the end of the platform immediately following the end of the restriction;
- The commencement board will be placed on the end of the platform immediately prior to the start of the restriction;
- The warning board will be placed on the end of the platform at the station immediately before the station with the commencement board on;
- Where an emergency speed indicator is needed this will be placed on the start of the same station platform as the warning board.

**SECTION D – GENERAL INSTRUCTIONS AND NOTICES**

- \*\* Items marked thus will not appear in future issues and a note must be taken of them by all concerned  
A thick vertical line denotes new or amended items

**NOTICES & AMENDMENTS BY LINE OF ROUTE CODE****SO250 BATTERSEA PIER JUNCTION TO WILLESDEN WEST LONDON JUNCTION****BETWEEN BATTERSEA PIER JUNCTION AND LATCHMERE JUNCTION  
FROM 0005 HOURS SATURDAY 7 FEBRUARY UNTIL 31 DECEMBER 2027**

Since 2024 on ongoing into 2027 the Victoria Area Phase 5 Re-signalling Project (Stewarts Lane, Longhedge Junction, Loughborough Junction, Nunhead, Ravensbourne, Herne Hill, Penge East area) continues undertaking civil and signal engineering installation works as below:

- installation of signal, location cases and Removeable Equipment Building (REB) foundations and buildings.
- Erection of signal structures and signal heads, including 4 foot equipment such as AWS, TPWS, Axle counter equipment, (Signal heads to remain covered and AWS cover plates to be fitted until commissioned)
- installation of speed indicators (to remain covered up until commissioned)
- Associated permanent way work.

(D23430) (07/02/2026) (14)

**SO500 VICTORIA TO BRIGHTON****GATWICK AIRPORT STATION**

The Gatwick Station Project is entering its final phase of construction works and the next phase of the project involves commissioning into use the permanent lighting fittings on Platforms 5, 6 and 7.

The current platform lighting in the central section of the abovementioned platforms remain temporary fittings affixed to hoardings. From Monday 11th September 2023 (Week 24) this central section of lighting shall be changed over to its permanent light fittings. All lighting changeovers shall be fully tested prior to changeover.

This is to ensure minimum lux levels and lighting uniformity is achieved and verified by GTR test trains prior to enacting changeover. Whilst this activity shall not impact or affect the operational railway, operational staff based at and passing through the station may observe that lighting positions on the platform have changed so prior notice is being provided.

(D/5342 – D20723) (11/09/2023) (UFN)

**HORLEY STATION****FROM 2345 SATURDAY 11 OCTOBER 2025**

As part of the upcoming refurbishment works planned at the Horley Station Footbridge, which connects the station to all platforms, and spanning all lines, will have scaffolding erected above the platform to support these works.

As drivers pass through this location, they will see the presence of this scaffolding and contractors working overhead.

The presence of this scaffolding and refurbishment works may be a source of distraction to drivers, so this notice is being provided to alert them of this change in the surroundings as they pass through this location.

(D23089) (11/10/2025) (UFN)

**SO645 BATTERSEA PARK TO PECKHAM RYE****BETWEEN BATTERSEA PARK AND PECKHAM RYE  
FROM 0005 HOURS SATURDAY 7 FEBRUARY UNTIL 31 DECEMBER 2027**

Since 2024 on ongoing into 2027 the Victoria Area Phase 5 Re-signalling Project (Stewarts Lane, Longhedge Junction, Loughborough Junction, Nunhead, Ravensbourne, Herne Hill, Penge East area) continues undertaking civil and signal engineering installation works as below:

- installation of signal, location cases and Removeable Equipment Building (REB) foundations and buildings.
- Erection of signal structures and signal heads, including 4 foot equipment such as AWS, TPWS, Axle counter equipment, (Signal heads to remain covered and AWS cover plates to be fitted until commissioned)
- installation of speed indicators (to remain covered up until commissioned)
- Associated permanent way work.

**MISCELLANEOUS INSTRUCTIONS****REPLACEMENT OF DOO STATION EQUIPMENT AT KENT ROUTE STATIONS****FROM WEDNESDAY 01 MAY 2024 UNTIL WEDNESDAY 01 MAY 2028****\*\*\*PLEASE NOTE THE END DATE HAS BEEN EXTENDED SINCE FIRST PUBLISHED\*\*\***

Driver Only Operation (DOO) equipment is gradually being replaced. The work mainly entails replacement of monitors and occasionally metalwork such as camera housings and monitor housings with new units at Kent route stations. Work will be undertaken between trains booked to call, or during white periods overnight.

Any queries should be directed to either Darren Goodall, or Doug Mackenzie – NR DOO Section Managers Kent.

(D/5341 – D20688) (27/04/2024) (UFN)

**WEEDSPRAYING TRAINS IN OPERATION****FROM MONDAY 9 MARCH 2026 UNTIL MONDAY 31 AUGUST 2026**

In 2026 multi-purpose vehicles (MPVs) and Envu (previously Bayer) trains will be delivering the national train-borne weed spray programme.

**If any staff are on or near the line when a Weed Control Train approaches, they should take the following action:**

- On the approach of the Weed Control Train staff must acknowledge and move to a position of safety
- Remain in the position of safety; **Make themselves visible** to the Weed Control Train. If the spray operators can see anyone who is working in the vicinity, they will suspend spraying as they pass the site.
- Staff should not 'hide' behind bushes in an attempt to avoid being sprayed. In such cases the spray operators may not see staff and the spray jets are specifically designed to penetrate bushes.

**The herbicides deployed by the Weed Control Train are biodegradable, non-irritant and non-harmful at the low concentrations used. In the unlikely event that staff are sprayed accidentally it is recommended that they take the following actions:**

1. If the eyes have been sprayed, rinse immediately with clean, water for 15 minutes and obtain medical aid if any discomfort is felt thereafter.
2. Rinse any exposed skin with clean water and wash with soap and water afterwards.
3. Avoid eating, drinking, or smoking until this procedure has been carried out.
4. Change any sprayed clothing at the earliest convenient time and retain in a plastic bag for collection.
5. Report the incident to the Route Operations Control.
6. Should any member of staff be sprayed they may obtain advice from SCO 24:7 Seasonal Controller 01908 723500 (Option 8)
7. If you have any medical concerns, please call the non-emergency NHS number – 111.

**Should any member of staff require any further information or advice please contact:**
