SO500 VICTORIA TO BRIGHTON**GATWICK AIRPORT STATION**

The Gatwick Station Project is entering its final phase of construction works and the next phase of the project involves commissioning into use the permanent lighting fittings on Platforms 5, 6 and 7.

The current platform lighting in the central section of the abovementioned platforms remain temporary fittings affixed to hoardings. From Monday 11th September 2023 (Week 24) this central section of lighting shall be changed over to its permanent light fittings. All lighting changeovers shall be fully tested prior to changeover.

This is to ensure minimum lux levels and lighting uniformity is achieved and verified by GTR test trains prior to enacting changeover. Whilst this activity shall not impact or affect the operational railway, operational staff based at and passing through the station may observe that lighting positions on the platform have changed so prior notice is being provided.

HORLEY STATION**FROM 2345 SATURDAY 11 OCTOBER 2025**

As part of the upcoming refurbishment works planned at the Horley Station Footbridge, which connects the station to all platforms, and spanning all lines, will have scaffolding erected above the platform to support these works.

As drivers pass through this location, they will see the presence of this scaffolding and contractors working overhead.

The presence of this scaffolding and refurbishment works may be a source of distraction to drivers, so this notice is being provided to alert them of this change in the surroundings as they pass through this location.

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE**MD101 EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE)****SPECIAL TEMPORARY INSTRUCTIONS RELATING TO EUSTON HS2
BETWEEN EUSTON STATION AND WEMBLEY/ WILLESDEN
UNTIL FURTHER NOTICE**

The following instructions for Signallers and the GB Railfreight Person In Charge (GBRf PIC) apply:

Working in to HS2 Works Siding 1. Arrivals.

Prior to departure of a Materials by Rail train that is planned to travel to HS2 Work Siding 1 (Euston) from Wembley/Willesden or Kilburn Up & Down Goods Loop, the Wembley Mainline SCC Signaller must advise the GB Railfreight Person In Charge (GBRf PIC) of the reporting number of the train and request acceptance of the train.

Before accepting the train, the GBRf PIC must ensure that the Siding is clear of any staff or obstructions.

When satisfied the above requirements are met, the GBRf PIC must operate the Shunters Acceptance Release to the 'OFF' Position to accept the train and confirm that the train is accepted for arrival.

Once the GBRf PIC has given the appropriate Shunters Acceptance Release and the slot light is illuminated to the Signaller, the Wembley Main Line Signallers can enable the Material by Rail service to depart from the Wembley/Willesden stabling areas or Kilburn Up & Down Goods Loop for London Euston HS2 Siding 1.

When the HS2 Materials By Rail Train has arrived into the HS2 Works Siding 1 the GBRf PIC must return the Shunters Acceptance Release to the 'ON' position. The PIC will provide the driver of the arriving train with a walkie-talkie radio.

When the HS2 Materials By Rail Train has arrived on the HS2 Works Siding 1, the Leading Locomotive into Euston must be shut down as soon as practicable to reduce noise and air pollution within the station. GBRf staff will apply the relevant train handbrakes to formally secure the train.

Once the train is secured, a Network Rail COSS will place 'NOT to be MOVED' boards on each locomotive cab end. The Network Rail COSS will then contact Wembley Mainline SCC Euston Panel signaller to request a Possession of Sidings for WS1. Once granted, work may commence to load the train. The GBRf PIC will then follow the pre-agreed Method of Work in conjunction with the Sidings Possession.

Departures. All HS2 Materials By Rail Trains must be ready to depart 15 minutes before the booked departure time. Once the loading operation has been completed, the Network Rail COSS will contact Wembley Mainline SCC Euston Panel signaller to hand back/cancel the Possession of Sidings for WS1. The COSS will arrange for the removal of the 'NOT to be MOVED' boards from each locomotive cab end. The GBRf PIC will contact the Wembley Main Line Euston Panel Signaller when the HS2 Materials By Rail Train is ready to depart to advise of; the train reporting number; that the driver is onboard ready to depart; and any other relevant details. The Wembley Main Line Signaller will interpose the Train Reporting Number In the appropriate Train Describer berth.

Before setting the route for the train to depart from HS2 Siding 1, the Wembley Main Line Euston Panel Signaller must advise the Wembley Main Line Willesden Panel Signaller that there is a HS2 Materials By Rail Train ready to depart for Wembley/Willesden stabling areas and confirm it can be accepted.

WEED SPRAYING TRAINS IN OPERATION**FROM MONDAY 9 MARCH 2026 UNTIL MONDAY 31 AUGUST 2026**

In 2026 multi-purpose vehicles (MPVs) and Envu (previously Bayer) trains will be delivering the national train-borne weed spray programme.

If any staff are on or near the line when a Weed Control Train approaches, they should take the following action:

- On the approach of the Weed Control Train staff must acknowledge and move to a position of safety
- Remain in the position of safety; **Make themselves visible** to the Weed Control Train. If the spray operators can see anyone who is working in the vicinity, they will suspend spraying as they pass the site.
- Staff should not 'hide' behind bushes in an attempt to avoid being sprayed. In such cases the spray operators may not see staff and the spray jets are specifically designed to penetrate bushes.

The herbicides deployed by the Weed Control Train are biodegradable, non-irritant and non-harmful at the low concentrations used. In the unlikely event that staff are sprayed accidentally it is recommended that they take the following actions:

- If the eyes have been sprayed, rinse immediately with clean, water for 15 minutes and obtain medical aid if any discomfort is felt thereafter.
- Rinse any exposed skin with clean water and wash with soap and water afterwards.
- Avoid eating, drinking, or smoking until this procedure has been carried out.
- Change any sprayed clothing at the earliest convenient time and retain in a plastic bag for collection.
- Report the incident to the Route Operations Control.
- Should any member of staff be sprayed they may obtain advice from SCO 24:7 Seasonal Controller 01908 723500 (Option 8)
- If you have any medical concerns, please call the non-emergency NHS number – 111.

Should any member of staff require any further information or advice please contact:

MISCELLANEOUS INSTRUCTIONS – Continued**MISCELLANEOUS INSTRUCTIONS****CLASS 153 VEHICLES FITTED WITH SANDING EQUIPMENT – (THIS NOTICE APPLIES TO THE LNW(S) ROUTE ONLY)**

Class 153 rolling stock are fitted with sanding equipment which the Driver will operate when it is necessary to stop the train in emergency, and / or during experienced conditions of very low railhead adhesion.

Each driving cab is fitted with the ability to supply sand which can be discharged and laid by the following methods:

- sand application manually operated during Brake Step 3;
- sand application automatically delivered during Emergency Braking; and
- sand application manually operated during Traction (e.g. train acceleration)

The application of sand by any of the above methods does not require the train to be removed from passenger operation / service, unless otherwise in circumstances advised by the Driver.

Driver's Actions

When the manual sanding equipment has been used at a speed below 10mph under braking conditions, the train must be brought to a stand and the Driver must inform the Signaller immediately and report the following:

- a) that the manual sanding equipment has been operated; and
- b) the location where the equipment was discharged and the current location of the train

If the Signaller cannot be contacted immediately via the signal post telephone, GSM-R radio, the Driver must place a track circuit operating clip on the line immediately in front of the train. To avoid delay, if the Driver alights to use a signal post telephone, a track circuit operating clip should be taken as well.

The Signaller may instruct the Driver to place a track circuit operating clip on the line immediately in front of the train.

When the Signaller confirms that the train has been protected, the Driver must provide the following additional information:

- R1. why the equipment was operated i.e. whether for a genuine emergency, system fault or operated in error
- R2. the location of poor railhead adhesion (where applicable) which required the sander to be operated; and
- R3. the units and vehicle number on which the sander was operated

When the train is ready to proceed, the Driver must obtain the Signaller's authorisation before moving the train. When a track circuit operating clip has been used, the Signaller's permission must be received before removing it from the line.

Signallers Actions

On receipt of a report from a Driver that the emergency sanding equipment has been operated on a unit, the Signaller must immediately:

- place or maintain the signal in rear of the train at Danger; and
- advise the Driver when the train is protected and record the information provided (on Bi-directional lines, protection must also be applied to prevent the approach of trains in both directions)

When it has been ascertained from the Driver that the train is able to proceed, movements may re-commence. Where applicable, the Signaller must instruct the Driver to remove the track circuit operating clip prior to the train proceeding. The next controlled signal in rear of where the sander was operated must be maintained at Danger behind the first train to proceed through the affected section, until the train has passed clear of the overlap of the signal in advance of where the train stopped and occupied the track circuit ahead. The passage of this first train must be observed to ensure that track circuits work correctly. This method of signalling shall continue until it has been ascertained that the track circuits are working correctly.

Where poor railhead adhesion problems have been reported, the Signaller must also observe Rule Book, Module TW1 – Preparation and movement of trains – General, Section 28 – Rail Adhesion.

The Signaller must inform Network Rail Control giving details of the unit and vehicle numbers, train running details, time and location of the incident and ensure that all details are recorded (train register / occurrence book) and complete a failure to operate track circuit form if applicable.
