SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued

MD101 EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE) – Continued
BETWEEN EUSTON AND QUEEN'S PARK
UNTIL AUGUST 2027

Drivers should be aware of the installation of monitoring equipment on and adjacent to the track, between 0m 35ch and 3m 55ch, on all lines.

Drivers may see equipment such as prisms and tilt meters mounted on the track/lineside structures and off track on stakes, and monitoring equipment adjacent the track including automated total stations on posts and wall brackets. The monitoring is being installed to monitor railway assets during the construction of the HS2 Euston Tunnels, using Tunnel Boring Machines, between Old Oak Common and London Euston.

An example of this is at signal WM121 on the Down Fast at Queen's Park 3m 32ch, see picture:

(D23730) (18/04/2026) (UFN)

WATFORD TUNNELS
UNTIL FURTHER NOTICE

Drivers should be aware Remote Earthwork Monitoring equipment will be installed to the low mileage end of Watford Tunnels. The system will include visible tilsensors, cameras and solar panels mounted on metal posts.

(D18671) (23/10/2021) (14R)

APSLEY STATION
UNTIL THURSDAY 31 DECEMBER 2026

Apsley platforms 1 and 2 (Fast lines) temporarily reduced in length
Apsley platforms 3 and 4 (Slow lines) temporarily reduced in length

In connection with the ongoing AFA Scheme works until December 2026 Apsley Station (all 4 platforms) are reduced in length and a temporary hoarding will be in place to demarcate this area.

Platform 1 is reduced by 120 metres (132 yards) at the London end leaving 88 metres (96 yards) of operational platform. Two UDS 8 boards have been removed and replaced with UDS 4 boards. An S car board is already installed and will remain in-situ unchanged.

Platform 2 is reduced by 125 metres (137 yards) at the London end leaving 88 metres (96 yards) of operational platform. All existing stop car signs have been covered up and a new S car board & 2 UDS 4 boards have been installed at the 86 metre mark.

Platform 3 is reduced by 155 metres (170 yards) at London end leaving 88 metres (96 yards) of operational platform. The existing 9/12 stop car sign marker has been removed and replaced with a S car board and two UDS 4 boards installed in the same location.

Platform 4 is reduced by 142 metres (156 yards) at the London end leaving 103 metres (113 yards) of operational platform. All existing stop car signs are covered up and a new S car board and two UDS 4 boards are installed at 101m mark.

WEED SPRAYING TRAINS IN OPERATION

FROM MONDAY 9 MARCH 2026 UNTIL MONDAY 31 AUGUST 2026

In 2026 multi-purpose vehicles (MPVs) and Envu (previously Bayer) trains will be delivering the national train-borne weed spray programme.

If any staff are on or near the line when a Weed Control Train approaches, they should take the following action:

- On the approach of the Weed Control Train staff must acknowledge and move to a position of safety
- Remain in the position of safety; **Make themselves visible** to the Weed Control Train. If the spray operators can see anyone who is working in the vicinity, they will suspend spraying as they pass the site.
- Staff should not 'hide' behind bushes in an attempt to avoid being sprayed. In such cases the spray operators may not see staff and the spray jets are specifically designed to penetrate bushes.

The herbicides deployed by the Weed Control Train are biodegradable, non-irritant and non-harmful at the low concentrations used. In the unlikely event that staff are sprayed accidentally it is recommended that they take the following actions:

- If the eyes have been sprayed, rinse immediately with clean, water for 15 minutes and obtain medical aid if any discomfort is felt thereafter.
- Rinse any exposed skin with clean water and wash with soap and water afterwards.
- Avoid eating, drinking, or smoking until this procedure has been carried out.
- Change any sprayed clothing at the earliest convenient time and retain in a plastic bag for collection.
- Report the incident to the Route Operations Control.
- Should any member of staff be sprayed they may obtain advice from SCO 24:7 Seasonal Controller 01908 723500 (Option 8)
- If you have any medical concerns, please call the non-emergency NHS number – 111.

Should any member of staff require any further information or advice please contact:

SCO 24:7 Seasonal Controller 01908 723500 (Option 8)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued**MISCELLANEOUS INSTRUCTIONS****CLASS 153 VEHICLES FITTED WITH SANDING EQUIPMENT – (THIS NOTICE APPLIES TO THE LNW(S) ROUTE ONLY)**

Class 153 rolling stock are fitted with sanding equipment which the Driver will operate when it is necessary to stop the train in emergency, and / or during experienced conditions of very low railhead adhesion.

Each driving cab is fitted with the ability to supply sand which can be discharged and laid by the following methods:

- sand application manually operated during Brake Step 3;
- sand application automatically delivered during Emergency Braking; and
- sand application manually operated during Traction (e.g. train acceleration)

The application of sand by any of the above methods does not require the train to be removed from passenger operation / service, unless otherwise in circumstances advised by the Driver.

Driver's Actions

When the manual sanding equipment has been used at a speed below 10mph under braking conditions, the train must be brought to a stand and the Driver must inform the Signaller immediately and report the following:

- a) that the manual sanding equipment has been operated; and
- b) the location where the equipment was discharged and the current location of the train

If the Signaller cannot be contacted immediately via the signal post telephone, GSM-R radio, the Driver must place a track circuit operating clip on the line immediately in front of the train. To avoid delay, if the Driver alights to use a signal post telephone, a track circuit operating clip should be taken as well.

The Signaller may instruct the Driver to place a track circuit operating clip on the line immediately in front of the train.

When the Signaller confirms that the train has been protected, the Driver must provide the following additional information:

- R1. why the equipment was operated i.e. whether for a genuine emergency, system fault or operated in error
- R2. the location of poor railhead adhesion (where applicable) which required the sander to be operated; and
- R3. the units and vehicle number on which the sander was operated

When the train is ready to proceed, the Driver must obtain the Signaller's authorisation before moving the train. When a track circuit operating clip has been used, the Signaller's permission must be received before removing it from the line.

Signallers Actions

On receipt of a report from a Driver that the emergency sanding equipment has been operated on a unit, the Signaller must immediately:

- place or maintain the signal in rear of the train at Danger; and
- advise the Driver when the train is protected and record the information provided (on Bi-directional lines, protection must also be applied to prevent the approach of trains in both directions)

When it has been ascertained from the Driver that the train is able to proceed, movements may re-commence. Where applicable, the Signaller must instruct the Driver to remove the track circuit operating clip prior to the train proceeding. The next controlled signal in rear of where the sander was operated must be maintained at Danger behind the first train to proceed through the affected section, until the train has passed clear of the overlap of the signal in advance of where the train stopped and occupied the track circuit ahead. The passage of this first train must be observed to ensure that track circuits work correctly. This method of signalling shall continue until it has been ascertained that the track circuits are working correctly.

Where poor railhead adhesion problems have been reported, the Signaller must also observe Rule Book, Module TW1 – Preparation and movement of trains – General, Section 28 – Rail Adhesion.

The Signaller must inform Network Rail Control giving details of the unit and vehicle numbers, train running details, time and location of the incident and ensure that all details are recorded (train register / occurrence book) and complete a failure to operate track circuit form if applicable.

(D14229) (08/05/2021) (16R)

**USE OF GSM-R TO ADVISE DRIVERS OF AN APPROACHING
TSR DUE TO A CONSTRUCTION SERVICES WORKSITE ON THE ADJACENT LINE -
(THIS NOTICE APPLIES TO THE LNW(N) & LNW(S) ROUTES ONLY)**

GSM-R berth triggered messages will be used to pass information to Drivers where TSRs are used when the adjacent line is a live worksite.

TSR boards will be used with the berth triggered broadcast acting as a supplementary message only.
