**NOTICES & AMENDMENTS BY LINE OF ROUTE CODE****SO250 BATTERSEA PIER JUNCTION TO WILLESDEN WEST LONDON JUNCTION****BETWEEN BATTERSEA PIER JUNCTION (0M 71CH) AND LATCHMERE JUNCTION 2M  
39CH UNTIL 31 DECEMBER 2025****\*\*\*NOTE THE END DATE HAS CHANGED SINCE IT WAS FIRST PUBLISHED\*\*\***

The Victoria Area Phase 5 Re-signalling Project (Stewarts Lane, Longhedge Junction, Loughborough Junction, Nunhead, Ravensbourne, Herne Hill, Penge East area) will be undertaking civil and signal engineering installation works as below:

- installation of signal, location cases and Removeable Equipment Building (REB) foundations and buildings
- erection of signal structures and signal heads (heads to remain covered up until commissioned)
- installation of speed indicators (to remain covered up until commissioned)
- associated permanent way work.

**NOTICES AND AMENDMENTS BY LINE OF ROUTE – Continued****SO500 VICTORIA TO BRIGHTON****BETWEEN THREE BRIDGES STATION AND BALCOMBE TUNNEL JN****FROM 0130 HOURS SATURDAY 29 MARCH 2025**

As part of the upcoming refurbishment works planned at the M23 Road Bridge, spanning all lines, between Three Bridges and Balcombe Tunnel Jn), scaffolding will be erected in the Trackside Cess and Overhead Bridge Parapets.

As drivers pass through this location, they will see the presence of this scaffolding and contractors working overhead.

The presence of this scaffolding and refurbishment works may be a source of distraction to drivers, so this notice is being provided to alert them of this change in the surroundings as they pass through this location.

(D22528) (29/03/2025) (UFN)

**GATWICK AIRPORT STATION ALTERATIONS PLATFORM LIGHTING SWITCHOVER**

The Gatwick Station Project is entering its final phase of construction works and the next phase of the project involves commissioning into use the permanent lighting fittings on Platforms 5, 6 and 7. The current platform lighting in the central section of the abovementioned platforms remain temporary fittings affixed to hoardings. From Monday 11th September 2023 (Week 24) this central section of lighting shall be changed over to its permanent light fittings. All lighting changeovers shall be fully tested prior to changeover. This is to ensure minimum lux levels and lighting uniformity is achieved and verified by GTR test trains prior to enacting changeover. Whilst this activity shall not impact or affect the operational railway, operational staff based at and passing through the station may observe that lighting positions on the platform have changed so prior notice is being provided.

Hard copy Sectional Appendix Page 62

**Rule Book Module TS1 – General signalling regulations**

**Explanation of Change:** This change is part of a wider project to update Module A of the Wessex Route Sectional Appendix, whilst also updating much of the terminology used within this instruction.

**Regulation 13.2 – COSS, IWA or PC blocking a line****Regulation 13.2.4 – Additional protection****Handbook 8 – IWA, COSS or PC blocking a line, section 2.5****Handbook 8 – IWA, COSS or PC blocking a line, section 2.6**

The use of an approved track circuit operating device (T-COD) is authorised throughout Network Rail Wessex Route (RWEX) subject to the conditions shown below, and as shown in the following tables.

If a section of route or location is not shown in the left-hand column and it does not show it as prohibited in the right-hand column, a T-COD must not be used.

**Approved track-circuit operating devices**

Only the following T-CODs are currently approved for use on Network Rail Wessex Route (RWEX):

- T-COD bullhead rail (SAFE 7265) Cat. No. 0057/052991
- T-COD flat-bottom rail (SAFE 7239) Cat. No. 0057/052992
- Manufacturer: Safetrack Baavhammer AB (may be identified as 'TRACK WARNING', 'SAFETRACK SAFE' or 'TRACK')
- Remote T-CODs and their location for use are detailed within the standard NR/L3/OPS/009
- ZKL3000 manufactured by Duel Inventive (Cat. No. 057/052973)
- ZKL3000RC manufactured by Duel Inventive (Cat. No. 057/052993)

**Manual track-circuit operating devices**

The following must be noted and understood before using a manual T-COD:

- Must not be used on a track circuit affected by track circuit failures, broken rail, or negative impedance bond.
- Must not be used on a line equipped with axle counters.
- Must not be used where permissive working applies (as indicated by the remarks PP, PP-A, PP-S, PP-C and PF in Table A of this publication).
- Must not be used on the approach to an OD, AHBC, ABCL or AOCL level crossing.
- Must not be applied between the signal protecting a CCTV or MCB level crossing and the level crossing itself.
- Must not be applied in 'fourth rail' electrified areas.
- Must not be applied where check or guard rails are provided.
- Must not be used where there are single-rail rack circuits on 'third rail' electrified areas (identified by the yellow cover on the underside of the running rail).
- Must not be used where track circuits in sidings are present
- Must not be used on a tokenless block line.
- May only be used by a person trained and certified competent in the use of the T-COD being applied.
- May only be used in areas where signals are controlled or maintained by the operation of track circuits.

**Cautionary notes**

- Applying a T-COD near points may inhibit the use of some signalled routes which are unaffected by the work.
- Applying a T-COD on a section of line that becomes part of an overlap track circuit may inhibit the use of some signalled routes which are unaffected by the work.
- Applying a T-COD in an area where Train-Operated Warning System (TOWS) is fitted will prompt a continuous warning from the TOWS equipment.

T-CODs must be applied either on the approach to the worksite or within the first signal section of the worksite itself. The presence of converging routes must be considered when planning protection by T-COD.
