The warning board situated on the Up (Temple Mills) line at 04 miles 43 chains applies to trains proceeding on the Down (Temple Mills) line (Up Direction). The temporary speed restriction equipment for trains travelling in the Up direction on the Down (Temple Mills) line between 04 miles 10 chains and 03m 79 chains is situated to the right of the track.

SECTION B - ENGINEERING ARRANGEMENTS.

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

GATWICK AIRPORT STATION ALTERATIONS PLATFORM LIGHTING SWITCHOVER

The Gatwick Station Project is entering its final phase of construction works and the next phase of the project involves commissioning into use the permanent lighting fittings on Platforms 5, 6 and 7. The current platform lighting in the central section of the abovementioned platforms remain temporary fittings affixed to hoardings. From Monday 11th September 2023 (Week 24) this central section of lighting shall be changed over to its permanent light fittings. All lighting changeovers shall be fully tested prior to changeover. This is to ensure minimum lux levels and lighting uniformity is achieved and verified by GTR test trains prior to enacting changeover. Whilst this activity shall not impact or affect the operational railway, operational staff based at and passing through the station may observe that lighting positions on the platform have changed so prior notice is being provided.
