SECTION B - ENGINEERING ARRANGEMENTS.

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

SO250 BATTERSEA PIER JUNCTION TO WILLESDEN WEST LONDON JUNCTION

FACTORY LANE BRIDGE

FROM 0250 HOURS MONDAY 22 JUNE 2026

UNTIL 0315 HOURS MONDAY 07 JUNE 2027

As part of the upcoming refurbishment and strengthening works at Factory Lane bridge (structure 341 located at 0m484y on the FLL1 and 7m00y on the ATL line) there will be some changes in surroundings that drivers need to be aware of.

From 02:50 on 22nd June 2026 until 03:15 on 7th June 2027 there will be access stairs and a suspended crash deck present on the structure that will be visible to drivers on the FLL lines above the parapet wall. This will be installed during possession hours in Week 12. The access stairs and crash deck are static structures that may present a source of distraction to drivers passing over the structure on the adjacent lines.

There is no planned ALO working during this period so drivers just need to be aware of the change in environment once these features are installed. These changes will have no impact on signal sighting and no operatives will be present on the scaffold outside of possession hours.

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE**MD101 EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE)****SPECIAL TEMPORARY INSTRUCTIONS RELATING TO EUSTON HS2
BETWEEN EUSTON STATION AND WEMBLEY/ WILLESDEN
UNTIL FURTHER NOTICE**

The following instructions for Signallers and the GB Railfreight Person In Charge (GBRf PIC) apply:

Working in to HS2 Works Siding 1. Arrivals.

Prior to departure of a Materials by Rail train that is planned to travel to HS2 Work Siding 1 (Euston) from Wembley/Willesden or Kilburn Up & Down Goods Loop, the Wembley Mainline SCC Signaller must advise the GB Railfreight Person In Charge (GBRf PIC) of the reporting number of the train and request acceptance of the train.

Before accepting the train, the GBRf PIC must ensure that the Siding is clear of any staff or obstructions.

When satisfied the above requirements are met, the GBRf PIC must operate the Shunters Acceptance Release to the 'OFF' Position to accept the train and confirm that the train is accepted for arrival.

Once the GBRf PIC has given the appropriate Shunters Acceptance Release and the slot light is illuminated to the Signaller, the Wembley Main Line Signallers can enable the Material by Rail service to depart from the Wembley/Willesden stabling areas or Kilburn Up & Down Goods Loop for London Euston HS2 Siding 1.

When the HS2 Materials By Rail Train has arrived into the HS2 Works Siding 1 the GBRf PIC must return the Shunters Acceptance Release to the 'ON' position. The PIC will provide the driver of the arriving train with a walkie-talkie radio.

When the HS2 Materials By Rail Train has arrived on the HS2 Works Siding 1, the Leading Locomotive into Euston must be shut down as soon as practicable to reduce noise and air pollution within the station. GBRf staff will apply the relevant train handbrakes to formally secure the train.

Once the train is secured, a Network Rail COSS will place 'NOT to be MOVED' boards on each locomotive cab end. The Network Rail COSS will then contact Wembley Mainline SCC Euston Panel signaller to request a Possession of Sidings for WS1. Once granted, work may commence to load the train. The GBRf PIC will then follow the pre-agreed Method of Work in conjunction with the Sidings Possession.

Departures. All HS2 Materials By Rail Trains must be ready to depart 15 minutes before the booked departure time. Once the loading operation has been completed, the Network Rail COSS will contact Wembley Mainline SCC Euston Panel signaller to hand back/cancel the Possession of Sidings for WS1. The COSS will arrange for the removal of the 'NOT to be MOVED' boards from each locomotive cab end. The GBRf PIC will contact the Wembley Main Line Euston Panel Signaller when the HS2 Materials By Rail Train is ready to depart to advise of; the train reporting number; that the driver is onboard ready to depart; and any other relevant details. The Wembley Main Line Signaller will interpose the Train Reporting Number in the appropriate Train Describer berth.

Before setting the route for the train to depart from HS2 Siding 1, the Wembley Main Line Euston Panel Signaller must advise the Wembley Main Line Willesden Panel Signaller that there is a HS2 Materials By Rail Train ready to depart for Wembley/Willesden stabling areas and confirm it can be accepted.
