AMENDMENTS TO OPERATING PUBLICATIONS – Continued
NETWORK RAIL KENT/SUSSEX/WESSEX ROUTES SECTIONAL APPENDIX
DATED 05 DECEMBER 2009 – Continued

MODULE KSW2 LOCAL INSTRUCTIONS**Hard Copy Sectional Appendix: 335**

Explanation of Change: This is to correct an existing local instruction that contains location errors, incorrect terminology as well as minor process changes

AMEND Local instruction as below.

SO320 - HOO JN. TO GRAIN (GOODS LINE)
CLIFFE GROUND FRAME (NK509 SIGNAL) – GRAIN CROSSING

'No Signaller' key token working.

Glossary: *Where reference is made throughout this instruction to "the Signaller" this refers to the Signaller at Ashford, North Kent Workstation 2*

The Rule Book, Module TW1, Section 34 applies, together with the following modifications:

Key Token instruments are provided adjacent to signal NK509 (at Cliffe ground frame) and at Grain Crossing box, the former being operated by the Driver (or, if provided, the Guard) and the latter being operated by the Crossing Keeper at Grain.

On arrival of a Down train at signal NK509 the Signaller must be advised of the intended movements and requested to release a token. If it is later necessary to vary from the intended movements the Signaller must again be advised. When the 'Free' indication beside the instrument is illuminated, the key token may be withdrawn, where upon signal NK509 will clear. The key token must be retained by the Driver until arrival at Grain where it must be handed to the Crossing Keeper. F.O.C. PIC's are not authorised to handle the token.

On arrival of an Up train at the 'End of Token Section' sign the key token must be replaced in the instrument and **before proceeding**, the Signaller must be contacted to confirm that this is correctly indicated in the signal box.

All persons using the key token hut must ensure that the door is properly closed and locked before leaving. The door is secured by a BR1 key, and Drivers must be in possession of such when working over this section.

Failure of Equipment – Working by Pilot

In the event of failure of the key token instrument, a key token being lost or damaged, Working by Pilot must be introduced.

Before pilot working commences, the Pilot must ensure that the floodgates are secured away from the railway.

When a train is to be followed by one or more trains in the same direction before a train is to start from the other end, the following additional instructions must be observed:-

- The Driver (*or, if provided, the Guard*) of any train proceeding from signal NK509 to Grain which is not accompanied by the Pilot must report the arrival of his train complete to the Crossing Keper at Grain, who must advise the Signaller accordingly.
- The Driver (*or, if provided, the Guard*) of any train proceeding from Grain to the token hut at the 'End of Token Section' sign which is not accompanied by the Pilot must report the arrival of his train to the Signaller, using the key token instrument telephone.

Should the telephones as well as the token equipment have failed, the Pilot must accompany each train.

Failure of Equipment – Modified Working

When authorised, Modified Working by means of a written order (RT3177) as shown in the Rule Book, Module P2, Section 7 'Modified Working Arrangements, may be introduced as follows;

The written order will be issued to and given up by the Driver as follows:

1.Trains travelling from Cliffe to Grain

When the train arrives at NK509 the Driver will be advised by the Signaller that the signalling equipment has failed and that they must complete a written order as authority to proceed. The Driver must complete the written order at the dictation of the Signaller. The order forms are kept in the token instrument cabinet near signal NK509. The Driver must advise the Crossing Keeper at Grain that the train has arrived complete with tail lamp and write cancelled across the ticket RT3177.

2.Trains travelling from Grain to Cliffe / Hoo Junction

When the train arrives at GC8 signal the Driver will be advised by the Crossing Keeper at Grain Crossing that the signalling equipment has failed and that they must complete a written order as authority to proceed. The Driver must complete the order at the dictation of the Signaller. The order forms are kept in Grain Crossing ground frame box. The Driver must advise the Signaller of his arrival at the token machine at Cliffe, near NK509 signal and that the train has arrived complete with tail lamp. The Driver must write 'cancelled' across the ticket RT3177, and dispose of it in accordance with their Company instructions.

MODULE KSW2 LOCAL INSTRUCTIONS Continued

Hard Copy Sectional Appendix: TBC

ADD The new local instruction

SO500 VICTORIA TO BRIGHTON**SELHURST**

Due to structural issues on - Bridge 57 Selhurst Road @ 9m 36ch, Down & Up Fast Lines Country end of Selhurst, there is currently an OPPOS restriction for movements of Loco Hauled trains or Light Loco's (either single or multiple Loco's).

- During movements of Loco Hauled train on the Down Fast the OPPOS restriction will apply to the Up Fast with protecting Signals T70 Up Fast / T74 Up Slow / T72 Up Selhurst Spur.
- During movements of Loco Hauled train on the Up Fast the OPPOS restriction will apply to the Down Fast with protecting Signal T67.

There are no restrictions for On Track Machines, MPV's, MMT & RHTT.

This instruction is subject to a STNC which will be removed on or before 31/03/27.

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE

SO250 BATTERSEA PIER JUNCTION TO WILLESDEN WEST LONDON JUNCTION

FACTORY LANE BRIDGE

FROM 0250 HOURS MONDAY 22 JUNE 2026

UNTIL 0315 HOURS MONDAY 07 JUNE 2027

As part of the upcoming refurbishment and strengthening works at Factory Lane bridge (structure 341 located at 0m484y on the FLL1 and 7m00y on the ATL line) there will be some changes in surroundings that drivers need to be aware of.

From 02:50 on 22nd June 2026 until 03:15 on 7th June 2027 there will be access stairs and a suspended crash deck present on the structure that will be visible to drivers on the FLL lines above the parapet wall. This will be installed during possession hours in Week 12. The access stairs and crash deck are static structures that may present a source of distraction to drivers passing over the structure on the adjacent lines.

There is no planned ALO working during this period so drivers just need to be aware of the change in environment once these features are installed. These changes will have no impact on signal sighting and no operatives will be present on the scaffold outside of possession hours.

(D11599) (16/04/16) (UFN)

MODULE LNW(S) 1- GENERAL INSTRUCTIONS

Hard copy Sectional Appendix page - TBC

OBJECTS ON THE OVERHEAD LINE EQUIPMENT (OLE)

Explanation of Change: New General Instruction

ADD the new General instruction as follows

If you are reporting an object on the OLE on Network Rail infrastructure in the North West & Central Region only, the Signaller will ask specific questions to find out:

1. The location of the object and whether it is on or near the contact wire.
2. The nature of the object.

If it is reported that the object on the OLE (including below or on the contact wire) is either (a) paper streamers; (b) lightweight plastic or paper (no larger than a shopping bag); or (c) a single rubber balloon, then:

- An electric train may be authorised to run through the obstruction at 5 mph with pantograph raised.
- A multi-mode train in self-powered mode or a diesel train may be authorised to run through the debris normally, or at 20 mph if the object is more than 150 mm (6 inches) below the contact wire.

The first train running through the debris with pantograph raised, must have two pantographs or be a freight train or empty stock train. The driver shall be requested to check their train's pantograph(s) after passing under the object, at the next opportunity – e.g. utilising in-cab CCTV or from a station platform.

Subsequent trains may have a single pantograph or multiple pantographs.

If the obstruction cannot be accurately described (e.g. due to poor visibility) or the material used in the object is uncertain, then the line will be closed initially and a competent person deployed to site in accordance with Rule Book, Module AC, Section 14.2.3.

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE**MD101 EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE)**

SPECIAL TEMPORARY INSTRUCTIONS RELATING TO EUSTON HS2
BETWEEN EUSTON STATION AND WEMBLEY/ WILLESDEN
UNTIL FURTHER NOTICE

The following instructions for Signallers and the GB Railfreight Person In Charge (GBRf PIC) apply:

Working in to HS2 Works Siding 1. Arrivals.

Prior to departure of a Materials by Rail train that is planned to travel to HS2 Work Siding 1 (Euston) from Wembley/Willesden or Kilburn Up & Down Goods Loop, the Wembley Mainline SCC Signaller must advise the GB Railfreight Person In Charge (GBRf PIC) of the reporting number of the train and request acceptance of the train.

Before accepting the train, the GBRf PIC must ensure that the Siding is clear of any staff or obstructions.

When satisfied the above requirements are met, the GBRf PIC must operate the Shunters Acceptance Release to the 'OFF' Position to accept the train and confirm that the train is accepted for arrival.

Once the GBRf PIC has given the appropriate Shunters Acceptance Release and the slot light is illuminated to the Signaller, the Wembley Main Line Signallers can enable the Material by Rail service to depart from the Wembley/Willesden stabling areas or Kilburn Up & Down Goods Loop for London Euston HS2 Siding 1.

When the HS2 Materials By Rail Train has arrived into the HS2 Works Siding 1 the GBRf PIC must return the Shunters Acceptance Release to the 'ON' position. The PIC will provide the driver of the arriving train with a walkie-talkie radio.

When the HS2 Materials By Rail Train has arrived on the HS2 Works Siding 1, the Leading Locomotive into Euston must be shut down as soon as practicable to reduce noise and air pollution within the station. GBRf staff will apply the relevant train handbrakes to formally secure the train.

Once the train is secured, a Network Rail COSS will place 'NOT to be MOVED' boards on each locomotive cab end. The Network Rail COSS will then contact Wembley Mainline SCC Euston Panel signaller to request a Possession of Sidings for WS1. Once granted, work may commence to load the train. The GBRf PIC will then follow the pre-agreed Method of Work in conjunction with the Sidings Possession.

Departures. All HS2 Materials By Rail Trains must be ready to depart 15 minutes before the booked departure time. Once the loading operation has been completed, the Network Rail COSS will contact Wembley Mainline SCC Euston Panel signaller to hand back/cancel the Possession of Sidings for WS1. The COSS will arrange for the removal of the 'NOT to be MOVED' boards from each locomotive cab end. The GBRf PIC will contact the Wembley Main Line Euston Panel Signaller when the HS2 Materials By Rail Train is ready to depart to advise of; the train reporting number; that the driver is onboard ready to depart; and any other relevant details. The Wembley Main Line Signaller will interpose the Train Reporting Number in the appropriate Train Describer berth.

Before setting the route for the train to depart from HS2 Siding 1, the Wembley Main Line Euston Panel Signaller must advise the Wembley Main Line Willesden Panel Signaller that there is a HS2 Materials By Rail Train ready to depart for Wembley/Willesden stabling areas and confirm it can be accepted.

MISCELLANEOUS INSTRUCTIONS – Continued**MD101 EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE) – Continued**

BETWEEN EUSTON AND QUEEN'S PARK
UNTIL AUGUST 2027

Drivers should be aware of the installation of monitoring equipment on and adjacent to the track, between 0m 35ch and 3m 55ch, on all lines.

Drivers may see equipment such as prisms and tilt meters mounted on the track/lineside structures and off track on stakes, and monitoring equipment adjacent the track including automated total stations on posts and wall brackets. The monitoring is being installed to monitor railway assets during the construction of the HS2 Euston Tunnels, using Tunnel Boring Machines, between Old Oak Common and London Euston.

An example of this is at signal WM121 on the Down Fast at Queen's Park 3m 32ch, see picture:

(D23730) (18/04/2026) (UFN)

BETWEEN HARROW & WEALDSTONE AND BUSHEY
FROM SUNDAY 20 SEPTEMBER 2026
UNTIL FURTHER NOTICE

Overline bridge LEC1/56 Oxhey Grange, about half a mile south of Bushey station 15m 51ch, over the Up Slow, Down Slow, Up Fast and Down Fast has structural issues and will be recovered. Please see section A of this notice for any Temporary Speed Restrictions.

(D24161) (20/09/2026) (31R)

WATFORD TUNNELS
UNTIL FURTHER NOTICE

Drivers should be aware Remote Earthwork Monitoring equipment will be installed to the low mileage end of Watford Tunnels. The system will include visible tilt sensors, cameras and solar panels mounted on metal posts.

(D18671) (23/10/2021) (26R)

APSLEY STATION
UNTIL THURSDAY 31 DECEMBER 2026

Apsley platforms 1 and 2 (Fast lines) temporarily reduced in length
Apsley platforms 3 and 4 (Slow lines) temporarily reduced in length

In connection with the ongoing AFA Scheme works until December 2026 Apsley Station (all 4 platforms) are reduced in length and a temporary hoarding will be in place to demarcate this area.

Platform 1 is reduced by 120 metres (132 yards) at the London end leaving 88 metres (96 yards) of operational platform. Two UDS 8 boards have been removed and replaced with UDS 4 boards. An S car board is already installed and will remain in-situ unchanged.

Platform 2 is reduced by 125 metres (137 yards) at the London end leaving 88 metres (96 yards) of operational platform. All existing stop car signs have been covered up and a new S car board & 2 UDS 4 boards have been installed at the 86 metre mark.

Platform 3 is reduced by 155 metres (170 yards) at London end leaving 88 metres (96 yards) of operational platform. The existing 9/12 stop car sign marker has been removed and replaced with a S car board and two UDS 4 boards installed in the same location.

Platform 4 is reduced by 142 metres (156 yards) at the London end leaving 103 metres (113 yards) of operational platform. All existing stop car signs are covered up and a new S car board and two UDS 4 boards are installed at 101m mark.

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE

SW100 WATERLOO TO CLAPHAM JUNCTION/LINFORD STREET

LAMBETH ROAD STRUCTURE 1/A13

FROM 06:00 MONDAY 6TH JULY 2026 UNTIL 15:00 MONDAY 30TH NOVEMBER 2026

As part of the upcoming repair and strengthening works taking place on Lambeth Road structure (located at 0m1080y on the BML1 line) there will be a number of changes in the surroundings over the upcoming months. From 06:00 on Monday 6th July, there will be a scaffold birdcage installed on the underside of the structure at 0m1080y. Following the birdcage installation, there will be the installation of a top lift within the period stated above which will be installed under a line blockage. Some of the features of this scaffold including the top lift will be visible to drivers above the parapet wall so prior notice is being provided.

There will be no impact to signal sighting because of this work.

(D23931) (07/07/2026) (35)

SO250 BATTERSEA PIER JN TO WILLESSEN WEST LONDON JN

(BEEN REQUESTED TO BE PUBLISHED IN WESSEX WON)

FACTORY LANE BRIDGE

FROM 0250 MONDAY 22 JUNE 2026 UNTIL 0315 MONDAY 07 JUNE 2027

As part of the upcoming refurbishment and strengthening works at Factory Lane bridge (structure 341 located at 0m484y on the FLL1 and 7m00y on the ATL line) there will be some changes in surroundings that drivers need to be aware of.

From 02:50 on 22nd June 2026 until 03:15 on 7th June 2027 there will be access stairs and a suspended crash deck present on the structure that will be visible to drivers on the FLL lines above the parapet wall. This will be installed during possession hours in Week 12. The access stairs and crash deck are static structures that may present a source of distraction to drivers passing over the structure on the adjacent lines.

There is no planned ALO working during this period so drivers just need to be aware of the change in environment once these features are installed. These changes will have no impact on signal sighting and no operatives will be present on the scaffold outside of possession hours.

UR611	Barking	Down Tilbury				2	2	Y
CA483	Chippenham Jn	Down Ely	SOB2	Cambridge	19/09/2024	15	3	Y

Last updated: 17/07/2026

Explanation of change: Signal C0690 removed
(D23949) (17/07/2026) (RSSB) (UFN)

MISCELLANEOUS INSTRUCTIONS**REPLACEMENT OF DOO STATION EQUIPMENT AT KENT ROUTE STATIONS**

FROM WEDNESDAY 01 MAY 2024 UNTIL WEDNESDAY 01 MAY 2028

*****PLEASE NOTE THE END DATE HAS BEEN EXTENDED SINCE FIRST PUBLISHED*****

Driver Only Operation (DOO) equipment is gradually being replaced. The work mainly entails replacement of monitors and occasionally metalwork such as camera housings and monitor housings with new units at Kent route stations

Work will be undertaken between trains booked to call, or during white periods overnight.

Any queries should be directed to either Darren Goodall, or Doug Mackenzie – NR DOO Section Managers Kent.

(D/5341 – D20688) (27/04/2024) (UFN)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

**** Items marked thus will not appear in future issues and a note must be taken of them by all concerned**
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued**MISCELLANEOUS INSTRUCTIONS****CLASS 153 VEHICLES FITTED WITH SANDING EQUIPMENT – (THIS NOTICE APPLIES TO THE LNW(S) ROUTE ONLY)**

Class 153 rolling stock are fitted with sanding equipment which the Driver will operate when it is necessary to stop the train in emergency, and / or during experienced conditions of very low railhead adhesion.

Each driving cab is fitted with the ability to supply sand which can be discharged and laid by the following methods:

- sand application manually operated during Brake Step 3;
- sand application automatically delivered during Emergency Braking; and
- sand application manually operated during Traction (e.g. train acceleration)

The application of sand by any of the above methods does not require the train to be removed from passenger operation / service, unless otherwise in circumstances advised by the Driver.

Driver's Actions

When the manual sanding equipment has been used at a speed below 10mph under braking conditions, the train must be brought to a stand and the Driver must inform the Signaller immediately and report the following:

- 1) that the manual sanding equipment has been operated; and
- 2) the location where the equipment was discharged and the current location of the train

If the Signaller cannot be contacted immediately via the signal post telephone, GSM-R radio, the Driver must place a track circuit operating clip on the line immediately in front of the train. To avoid delay, if the Driver alights to use a signal post telephone, a track circuit operating clip should be taken as well.

The Signaller may instruct the Driver to place a track circuit operating clip on the line immediately in front of the train.

When the Signaller confirms that the train has been protected, the Driver must provide the following additional information:

- why the equipment was operated i.e. whether for a genuine emergency, system fault or operated in error
- the location of poor railhead adhesion (where applicable) which required the sander to be operated; and
- the units and vehicle number on which the sander was operated

When the train is ready to proceed, the Driver must obtain the Signaller's authorisation before moving the train. When a track circuit operating clip has been used, the Signaller's permission must be received before removing it from the line.

Signallers Actions

On receipt of a report from a Driver that the emergency sanding equipment has been operated on a unit, the Signaller must immediately:

- place or maintain the signal in rear of the train at Danger; and
- advise the Driver when the train is protected and record the information provided (on Bi-directional lines, protection must also be applied to prevent the approach of trains in both directions)

When it has been ascertained from the Driver that the train is able to proceed, movements may re-commence. Where applicable, the Signaller must instruct the Driver to remove the track circuit operating clip prior to the train proceeding. The next controlled signal in rear of where the sander was operated must be maintained at Danger behind the first train to proceed through the affected section, until the train has passed clear of the overlap of the signal in advance of where the train stopped and occupied the track circuit ahead. The passage of this first train must be observed to ensure that track circuits work correctly. This method of signalling shall continue until it has been ascertained that the track circuits are working correctly.

Where poor railhead adhesion problems have been reported, the Signaller must also observe Rule Book, Module TW1 – Preparation and movement of trains – General, Section 28 – Rail Adhesion.

The Signaller must inform Network Rail Control giving details of the unit and vehicle numbers, train running details, time and location of the incident and ensure that all details are recorded (train register / occurrence book) and complete a failure to operate track circuit form if applicable.

(D14229) (08/05/2021) (44R) ■

USE OF GSM-R TO ADVISE DRIVERS OF AN APPROACHING
TSR DUE TO A CONSTRUCTION SERVICES WORKSITE ON THE ADJACENT LINE -
(THIS NOTICE APPLIES TO THE LNW(N) & LNW(S) ROUTES ONLY)

GSM-R berth triggered messages will be used to pass information to Drivers where TSRs are used when the adjacent line is a live worksite.

TSR boards will be used with the berth triggered broadcast acting as a supplementary message only.

(D14255) (30/06/2018) (UFN)
