**MISCELLANEOUS INSTRUCTIONS – Continued****SO500 VICTORIA TO BRIGHTON****GATWICK AIRPORT STATION ALTERATIONS PLATFORM LIGHTING SWITCHOVER**

The Gatwick Station Project is entering its final phase of construction works and the next phase of the project involves commissioning into use the permanent lighting fittings on Platforms 5, 6 and 7.

The current platform lighting in the central section of the abovementioned platforms remain temporary fittings affixed to hoardings. From Monday 11th September 2023 (Week 24) this central section of lighting shall be changed over to its permanent light fittings. All lighting changeovers shall be fully tested prior to changeover.

This is to ensure minimum lux levels and lighting uniformity is achieved and verified by GTR test trains prior to enacting changeover. Whilst this activity shall not impact or affect the operational railway, operational staff based at and passing through the station may observe that lighting positions on the platform have changed so prior notice is being provided.

(D/5342 – D20723) (11/09/2023) (UFN)

**GROSVENOR RIVER BRIDGE****08:00 TUESDAY 19 SEPTEMBER 2025 UNTIL 18:00 THURSDAY 05 FEBRUARY 2026**

As part of the upcoming drainage works at Grosvenor River Bridge (located between 0m1298y and 0m1612y on the VTB1) there will be some changes in surroundings that drivers need to be aware of.

From 08:00 on Tuesday 19th September 2025 until 18:00 on Thursday 5th February 2026 drainage pot remedial works will be undertaken and as part of this the team will be erecting a Haki staircase to the north abutment of the bridge.

This staircase will be visible above the parapet wall and is a potential source of distraction to drivers passing through the area on the adjacent lines.

The staircase will be positioned adjacent to the Brighton Reversible line at approximately 0m1563y.

When passing through this location drivers may also see operatives on the staircase carrying out work under an ALO plan (hand tools only). This work or the presence of this staircase will not impact signal sighting.

(D22920) (19/09/2025) (45)

**HORLEY STATION****FROM 2345 HOURS SATURDAY 11 OCTOBER 2025 TO 0400 MONDAY 9 FEBRUARY 2026**

As part of the upcoming refurbishment works planned at the Horley Station Footbridge, which connects the station to all platforms, and spanning all lines, will have scaffolding erected above the platform to support these works.

As drivers pass through this location, they will see the presence of this scaffolding and contractors working overhead.

The presence of this scaffolding and refurbishment works may be a source of distraction to drivers, so this notice is being provided to alert them of this change in the surroundings as they pass through this location.

**Last Updated** 25/10/2025

**Explanation of Change:** Signal TVC530/VC530 has been added.  
(D23151) (25/10/2025) (UFN)

**SECTION D – GENERAL INSTRUCTIONS AND NOTICES**

\*\* Items marked thus will not appear in future issues and a note must be taken of them by all concerned  
A thick vertical line denotes new or amended items

**AMENDMENTS TO OPERATING PUBLICATIONS – Continued****MISCELLANEOUS INSTRUCTIONS****CLASS 153 VEHICLES FITTED WITH SANDING EQUIPMENT – (THIS NOTICE APPLIES TO THE LNW(S) ROUTE ONLY)**

Class 153 rolling stock are fitted with sanding equipment which the Driver will operate when it is necessary to stop the train in emergency, and / or during experienced conditions of very low railhead adhesion.

Each driving cab is fitted with the ability to supply sand which can be discharged and laid by the following methods:

1. sand application manually operated during Brake Step 3;
2. sand application automatically delivered during Emergency Braking; and
3. sand application manually operated during Traction (e.g. train acceleration)

The application of sand by any of the above methods does not require the train to be removed from passenger operation / service, unless otherwise in circumstances advised by the Driver.

**Driver's Actions**

When the manual sanding equipment has been used at a speed below 10mph under braking conditions, the train must be brought to a stand and the Driver must inform the Signaller immediately and report the following:

- R1 that the manual sanding equipment has been operated; and  
R2 the location where the equipment was discharged and the current location of the train

If the Signaller cannot be contacted immediately via the signal post telephone, GSM-R radio, the Driver must place a track circuit operating clip on the line immediately in front of the train. To avoid delay, if the Driver alights to use a signal post telephone, a track circuit operating clip should be taken as well.

The Signaller may instruct the Driver to place a track circuit operating clip on the line immediately in front of the train.

When the Signaller confirms that the train has been protected, the Driver must provide the following additional information:

- why the equipment was operated i.e. whether for a genuine emergency, system fault or operated in error
- the location of poor railhead adhesion (where applicable) which required the sander to be operated; and
- the units and vehicle number on which the sander was operated

When the train is ready to proceed, the Driver must obtain the Signaller's authorisation before moving the train. When a track circuit operating clip has been used, the Signaller's permission must be received before removing it from the line.

**Signallers Actions**

On receipt of a report from a Driver that the emergency sanding equipment has been operated on a unit, the Signaller must immediately:

- place or maintain the signal in rear of the train at Danger; and
- advise the Driver when the train is protected and record the information provided (on Bi-directional lines, protection must also be applied to prevent the approach of trains in both directions)

When it has been ascertained from the Driver that the train is able to proceed, movements may re-commence. Where applicable, the Signaller must instruct the Driver to remove the track circuit operating clip prior to the train proceeding. The next controlled signal in rear of where the sander was operated must be maintained at Danger behind the first train to proceed through the affected section, until the train has passed clear of the overlap of the signal in advance of where the train stopped and occupied the track circuit ahead. The passage of this first train must be observed to ensure that track circuits work correctly. This method of signalling shall continue until it has been ascertained that the track circuits are working correctly.

Where poor railhead adhesion problems have been reported, the Signaller must also observe Rule Book, Module TW1 – Preparation and movement of trains – General, Section 28 – Rail Adhesion.

The Signaller must inform Network Rail Control giving details of the unit and vehicle numbers, train running details, time and location of the incident and ensure that all details are recorded (train register / occurrence book) and complete a failure to operate track circuit form if applicable.

(D14229) (08/05/2021) (36R)

**USE OF GSM-R TO ADVISE DRIVERS OF AN APPROACHING  
TSR DUE TO A HIGH OUTPUT WORKSITE ON THE ADJACENT LINE -  
(THIS NOTICE APPLIES TO THE LNW(N) & LNW(S) ROUTES ONLY)**

GSM-R berth triggered messages will be used to pass information to Drivers where TSRs are used when the adjacent line is a live worksite.

TSR boards will be used with the berth triggered broadcast acting as a supplementary message only.

(D14255) (30/06/2018) (UFN)
