**SECTION B - ENGINEERING ARRANGEMENTS.**

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

**NOTICES & AMENDMENTS BY LINE OF ROUTE CODE****EA1040 ROMFORD TO UPMINSTER****TOP OF PLATFORM RAMP AT ROMFORD****FROM 01:00 HOURS TUESDAY 21<sup>st</sup> OCTOBER 2025 UNTIL FURTHER NOTICE.**

A Temporary speed restriction of 5 MPH will apply to platform 1 only beginning at the top of the platform ramp, located at 00 Miles 03 Chains to the buffer stops located at 00 Miles 00 Chains.

**N.B.** The 5 MPH speed restriction is applicable to trains arriving at Romford Platform 1 only. All departing trains returning to Upminster may depart at the published line speed of 15 MPH.

(D23170) (21/10/2025) (UFN)

**EA1310 CAMDEN ROAD WEST JUNCTION TO RICHMOND****ACTON WELLS EAST JUNCTION**

OHL wire runs have been extended from the North London Lines onto the Poplars between 0m 39ch AWL to 0m 50ch AWL.

(D23012) (03/11/2025) (UFN)

**EA1380 FENCHURCH STREET TO SHOEBURYNESS****FENCHURCH STREET STATION****FROM MONDAY 6<sup>TH</sup> OCTOBER 2025 UNTIL MONDAY 9<sup>TH</sup> MARCH 2026**

As train drivers pass on the Up and Down lines near Fenchurch Street Station (0m 23ch) they may observe the construction of a steelwork structure adjacent to the Up Slow line and over the DLR tracks.

This may be a source of distraction for drivers.

ASPRO Contact No 07809379059

(D23332) (01/12/2025) (50)

**CHALKWELL STATION****FROM 16 FEBRUARY 2026 UNTIL 3 JANUARY 2027**

As part of the ongoing footbridge replacement works at Chalkwell station (33m 69ch), a temporary scaffold constructed footbridge will be erected over both running lines to maintain access. The existing footbridge will then be demolished and replaced with a new structure.

Train drivers should be aware of the potential distraction caused by the presence of the temporary footbridge and associated works at this location.

(D17882) (20/03/2021) (UFN)

**NOTICES & AMENDMENTS BY LINE OF ROUTE CODE****SO250 BATTERSEA PIER JUNCTION TO WILLESDEN WEST LONDON JUNCTION****BETWEEN BATTERSEA PIER JUNCTION AND LATCHMERE JUNCTION  
FROM 0005 HOURS SATURDAY 7 FEBRUARY UNTIL 31 DECEMBER 2027**

Since 2024 on ongoing into 2027 the Victoria Area Phase 5 Re-signalling Project (Stewarts Lane, Longhedge Junction, Loughborough Junction, Nunhead, Ravensbourne, Herne Hill, Penge East area) continues undertaking civil and signal engineering installation works as below:

- installation of signal, location cases and Removeable Equipment Building (REB) foundations and buildings.
- Erection of signal structures and signal heads, including 4 foot equipment such as AWS, TPWS, Axle counter equipment, (Signal heads to remain covered and AWS cover plates to be fitted until commissioned)
- installation of speed indicators (to remain covered up until commissioned)
- Associated permanent way work.

(D23430) (07/02/2026) (14)

**SO500 VICTORIA TO BRIGHTON****GATWICK AIRPORT STATION ALTERATIONS PLATFORM LIGHTING SWITCHOVER**

The Gatwick Station Project is entering its final phase of construction works and the next phase of the project involves commissioning into use the permanent lighting fittings on Platforms 5, 6 and 7.

The current platform lighting in the central section of the abovementioned platforms remain temporary fittings affixed to hoardings. From Monday 11th September 2023 (Week 24) this central section of lighting shall be changed over to its permanent light fittings. All lighting changeovers shall be fully tested prior to changeover.

This is to ensure minimum lux levels and lighting uniformity is achieved and verified by GTR test trains prior to enacting changeover. Whilst this activity shall not impact or affect the operational railway, operational staff based at and passing through the station may observe that lighting positions on the platform have changed so prior notice is being provided.

(D/5342 – D20723) (11/09/2023) (UFN)

**HORLEY STATION****FROM 2345 SATURDAY 11 OCTOBER 2025 TO 0400 MONDAY 9 FEBRUARY 2026**

As part of the upcoming refurbishment works planned at the Horley Station Footbridge, which connects the station to all platforms, and spanning all lines, will have scaffolding erected above the platform to support these works.

As drivers pass through this location, they will see the presence of this scaffolding and contractors working overhead.

The presence of this scaffolding and refurbishment works may be a source of distraction to drivers, so this notice is being provided to alert them of this change in the surroundings as they pass through this location.

(D23089) (11/10/2025) (UFN)

**SO645 BATTERSEA PARK TO PECKHAM RYE****BETWEEN BATTERSEA PARK AND PECKHAM RYE  
FROM 0005 HOURS SATURDAY 7 FEBRUARY UNTIL 31 DECEMBER 2027**

Since 2024 on ongoing into 2027 the Victoria Area Phase 5 Re-signalling Project (Stewarts Lane, Longhedge Junction, Loughborough Junction, Nunhead, Ravensbourne, Herne Hill, Penge East area) continues undertaking civil and signal engineering installation works as below:

- installation of signal, location cases and Removeable Equipment Building (REB) foundations and buildings.
- Erection of signal structures and signal heads, including 4 foot equipment such as AWS, TPWS, Axle counter equipment, (Signal heads to remain covered and AWS cover plates to be fitted until commissioned)
- installation of speed indicators (to remain covered up until commissioned)

\*\* Items marked thus will not appear in future issues and a note must be taken of them by all concerned

A thick vertical line denotes new or amended items

**AMENDMENTS TO OPERATING PUBLICATIONS – Continued****NETWORK RAIL LONDON NORTH WESTERN SOUTH ROUTE SECTIONAL APPENDIX**

**DATED 02 DECEMBER 2006 – Continued**

**MODULE LNW(S) 2 LOCAL INSTRUCTIONS**

\*\* **Hard copy Sectional Appendix page 242**

**Explanation of change:** Correct GB Railfreight Person in Charge of Sidings to GB Railfreight Person In Charge (GBRf PIC).

**Amend** The Working in the Middle Sidings section and the following sections as follows:

**MD101 - EUSTON TO ARMITAGE JUNCTION (EXCLUSIVE)****EUSTON**

**Working in the Middle Sidings.** After working trains into the Middle Siding or Middle Sidings 1 and 2. Drivers of departing locomotives must await instructions from the Signaller at Wembley Mainline SCC before moving towards the exit signal. Drivers taking over locomotives or trains in the Middle Sidings must obtain permission to move, by telephone, from the Signaller at Wembley Mainline SCC.

**Working in to HS2 Works Siding 1. Arrivals.**

Prior to departure of a Materials by Rail train that is planned to travel to HS2 Work Siding 1 (Euston) from Wembley/Willesden or Kilburn Up & Down Goods Loop, the Wembley Mainline SCC Signaller must advise the GB Railfreight Person In Charge (GBRf PIC) of the reporting number of the train and request acceptance of the train.

Before accepting the train, the GBRf PIC must ensure that the Siding is clear of any staff or obstructions.

When satisfied the above requirements are met, the GBRf PIC must operate the Shunters Acceptance Release to the 'OFF' Position to accept the train and confirm that the train is accepted for arrival.

Once the GBRf PIC has given the appropriate Shunters Acceptance Release and the slot light is illuminated to the Signaller, the Wembley Main Line Signallers can enable the Material by Rail service to depart from the Wembley/Willesden stabling areas or Kilburn Up & Down Goods Loop for London Euston HS2 Siding 1.

When the HS2 Materials By Rail Train has arrived into the HS2 Works Siding 1 the GBRf PIC must return the Shunters Acceptance Release to the 'ON' position. The PIC will provide the driver of the arriving train with a walkie-talkie radio.

When the HS2 Materials By Rail Train has arrived on the HS2 Works Siding 1, the Leading Locomotive into Euston must be shut down as soon as practicable to reduce noise and air pollution within the station. GBRf staff will apply the relevant train handbrakes to formally secure the train.

Once the train is secured, a Network Rail COSS will place 'NOT to be MOVED' boards on each locomotive cab end. The Network Rail COSS will then contact Wembley Mainline SCC Euston Panel signaller to request a Possession of Sidings for WS1. Once granted, work may commence to load the train. The GBRf PIC will then follow the pre-agreed Method of Work in conjunction with the Sidings Possession.

**Departures.** All HS2 Materials By Rail Trains must be ready to depart 15 minutes before the booked departure time. Once the loading operation has been completed, the Network Rail COSS will contact Wembley Mainline SCC Euston Panel signaller to hand back/cancel the Possession of Sidings for WS1. The COSS will arrange for the removal of the 'NOT to be MOVED' boards from each locomotive cab end. The GBRf PIC will contact the Wembley Main Line Euston Panel Signaller when the HS2 Materials By Rail Train is ready to depart to advise of; the train reporting number; that the driver is onboard ready to depart; and any other relevant details. The Wembley Main Line Signaller will interpose the Train Reporting Number In the appropriate Train Describer berth.

Prior to any departure, the GBRf PIC must undertake sufficient pre-departure checks, in line with relevant standards (see Section 7), to ensure that no materials spill from the wagons onto the network. This will be subject to independent checks as and when required by Network Rail. When ready to depart, the driver of the MBR train will hand back the walkie-talkie radio to the GBRf PIC.

When the train is ready to depart from HS2 Siding 1, the GBRf PIC must contact the Wembley Main Line Signaller and confirm the train reporting number; that the driver is onboard ready to depart; and any other relevant details. The Wembley Main Line Signaller must interpose the Train Reporting Number In the appropriate Train Describer berth.

Before setting the route for the train to depart from HS2 Siding 1, the Wembley Main Line Euston Panel Signaller must advise the Wembley Main Line Willesden Panel Signaller that there is a HS2 Materials By Rail Train ready to depart for Wembley/Willesden stabling areas and confirm it can be accepted.

**Working of Class 253/254 trains.** Class 253/254 trains are prohibited from using platforms 1 to 3, 8 to 11 and 16.

The Driver of a Class 253/254 train entering platforms 4 to 7 or 12 to 15 must not proceed beyond the 'HST Stop' Board at the South end of the platform. Immediately upon arrival in the platform, the leading power car must be shut down and not restarted until 10 minutes before expected departure time.

A thick vertical line denotes new or amended items

**MISCELLANEOUS INSTRUCTIONS – Continued****MISCELLANEOUS INSTRUCTIONS****CLASS 153 VEHICLES FITTED WITH SANDING EQUIPMENT – (THIS NOTICE APPLIES TO THE LNW(S) ROUTE ONLY)**

Class 153 rolling stock are fitted with sanding equipment which the Driver will operate when it is necessary to stop the train in emergency, and / or during experienced conditions of very low railhead adhesion.

Each driving cab is fitted with the ability to supply sand which can be discharged and laid by the following methods:

- sand application manually operated during Brake Step 3;
- sand application automatically delivered during Emergency Braking; and
- sand application manually operated during Traction (e.g. train acceleration)

The application of sand by any of the above methods does not require the train to be removed from passenger operation / service, unless otherwise in circumstances advised by the Driver.

**Driver's Actions**

When the manual sanding equipment has been used at a speed below 10mph under braking conditions, the train must be brought to a stand and the Driver must inform the Signaller immediately and report the following:

- that the manual sanding equipment has been operated; and
- the location where the equipment was discharged and the current location of the train

If the Signaller cannot be contacted immediately via the signal post telephone, GSM-R radio, the Driver must place a track circuit operating clip on the line immediately in front of the train. To avoid delay, if the Driver alights to use a signal post telephone, a track circuit operating clip should be taken as well.

The Signaller may instruct the Driver to place a track circuit operating clip on the line immediately in front of the train.

When the Signaller confirms that the train has been protected, the Driver must provide the following additional information:

- a) why the equipment was operated i.e. whether for a genuine emergency, system fault or operated in error
- b) the location of poor railhead adhesion (where applicable) which required the sander to be operated; and
- c) the units and vehicle number on which the sander was operated

When the train is ready to proceed, the Driver must obtain the Signaller's authorisation before moving the train. When a track circuit operating clip has been used, the Signaller's permission must be received before removing it from the line.

**Signallers Actions**

On receipt of a report from a Driver that the emergency sanding equipment has been operated on a unit, the Signaller must immediately:

1. place or maintain the signal in rear of the train at Danger; and
2. advise the Driver when the train is protected and record the information provided (on Bi-directional lines, protection must also be applied to prevent the approach of trains in both directions)

When it has been ascertained from the Driver that the train is able to proceed, movements may re-commence. Where applicable, the Signaller must instruct the Driver to remove the track circuit operating clip prior to the train proceeding. The next controlled signal in rear of where the sander was operated must be maintained at Danger behind the first train to proceed through the affected section, until the train has passed clear of the overlap of the signal in advance of where the train stopped and occupied the track circuit ahead. The passage of this first train must be observed to ensure that track circuits work correctly. This method of signalling shall continue until it has been ascertained that the track circuits are working correctly.

Where poor railhead adhesion problems have been reported, the Signaller must also observe Rule Book, Module TW1 – Preparation and movement of trains – General, Section 28 – Rail Adhesion.

The Signaller must inform Network Rail Control giving details of the unit and vehicle numbers, train running details, time and location of the incident and ensure that all details are recorded (train register / occurrence book) and complete a failure to operate track circuit form if applicable.

(D14229) (08/05/2021) (50R)

**USE OF GSM-R TO ADVISE DRIVERS OF AN APPROACHING  
TSR DUE TO A HIGH OUTPUT WORKSITE ON THE ADJACENT LINE -  
(THIS NOTICE APPLIES TO THE LNW(N) & LNW(S) ROUTES ONLY)**

GSM-R berth triggered messages will be used to pass information to Drivers where TSRs are used when the adjacent line is a live worksite.

TSR boards will be used with the berth triggered broadcast acting as a supplementary message only.

(D14255) (30/06/2018) (UFN)
