SECTION B - ENGINEERING ARRANGEMENTS.

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

Rule Book Module TS1 – General signalling regulations

Explanation of Change: This change is part of a wider project to update Module A of the Wessex Route Sectional Appendix, whilst also updating much of the terminology used within this instruction.

Regulation 13.2 – COSS, IWA or PC blocking a line**Regulation 13.2.4 – Additional protection****Handbook 8 – IWA, COSS or PC blocking a line, section 2.5****Handbook 8 – IWA, COSS or PC blocking a line, section 2.6**

The use of an approved track circuit operating device (T-COD) is authorised throughout Network Rail Wessex Route (RWEX) subject to the conditions shown below, and as shown in the following tables.

If a section of route or location is not shown in the left-hand column and it does not show it as prohibited in the right-hand column, a T-COD must not be used.

Approved track-circuit operating devices

Only the following T-CODs are currently approved for use on Network Rail Wessex Route (RWEX):

- T-COD bullhead rail (SAFE 7265) Cat. No. 0057/052991
- T-COD flat-bottom rail (SAFE 7239) Cat. No. 0057/052992
- Manufacturer: Safetrack Baavhammer AB (may be identified as 'TRACK WARNING', 'SAFETRACK SAFE' or 'TRACK')
- Remote T-CODs and their location for use are detailed within the standard NR/L3/OPS/009
- ZKL3000 manufactured by Duel Inventive (Cat. No. 057/052973)
- ZKL3000RC manufactured by Duel Inventive (Cat. No. 057/052993)

Manual track-circuit operating devices

The following must be noted and understood before using a manual T-COD:

- Must not be used on a track circuit affected by track circuit failures, broken rail, or negative impedance bond.
- Must not be used on a line equipped with axle counters.
- Must not be used where permissive working applies (as indicated by the remarks PP, PP-A, PP-S, PP-C and PF in Table A of this publication).
- Must not be used on the approach to an OD, AHBC, ABCL or AOCL level crossing.
- Must not be applied between the signal protecting a CCTV or MCB level crossing and the level crossing itself.
- Must not be applied in 'fourth rail' electrified areas.
- Must not be applied where check or guard rails are provided.
- Must not be used where there are single-rail rack circuits on 'third rail' electrified areas (identified by the yellow cover on the underside of the running rail).
- Must not be used where track circuits in sidings are present
- Must not be used on a tokenless block line.
- May only be used by a person trained and certified competent in the use of the T-COD being applied.
- May only be used in areas where signals are controlled or maintained by the operation of track circuits.

Cautionary notes

- Applying a T-COD near points may inhibit the use of some signalled routes which are unaffected by the work.
- Applying a T-COD on a section of line that becomes part of an overlap track circuit may inhibit the use of some signalled routes which are unaffected by the work.
- Applying a T-COD in an area where Train-Operated Warning System (TOWS) is fitted will prompt a continuous warning from the TOWS equipment.

T-CODs must be applied either on the approach to the worksite or within the first signal section of the worksite itself. The presence of converging routes must be considered when planning protection by T-COD.
