SECTION B - ENGINEERING ARRANGEMENTS.

| At or Between | Lines Affected | Remarks |
|---------------|----------------|---------|
|---------------|----------------|---------|

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

Protecting a stabled train on a platform line – Wessex Route

A platform line on which a train is stabled may be blocked under the arrangements shown in this handbook, but only if protection is provided to stop a train making an unauthorised movement.

1. During daylight: a “NOT TO BE MOVED” board, or a red flag
2. During darkness, fog or falling snow: a red light (steady or flashing)

The SWL / IWA, COSS or PC must make sure the protection is displayed on the platform side of the train:

- a) at the end from which the train is to be driven, or
- b) at both ends of the train if it can be driven from either end

The arrangements shall apply at the following locations

- 1) On platform lines at terminal stations
- 2) On dead end bay lines at through stations
- 3) On the running lines shown in “Berthing of trains – Wessex in Module KSW1 of the Sectional Appendix”

The Possession Limit Board (PLB) will be placed 15 metres beyond the front of the stabled train and fixed to the left hand rail, so it is visible to any driver from the driving cab.

Drivers are allowed to enter the driving cab for the purpose of preparing the train in accordance with their company instructions.

Unless otherwise stated / advised, the traction current must be treated as being live at all times.
