SECTION B - ENGINEERING ARRANGEMENTS.

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

SECTION C – SIGNALLING AND PERMANENT WAY ALTERATIONS

****** Items marked thus will not appear in future issues and a note must be taken of them by all concerned

A thick vertical line denotes new or amended items

Important Guidelines for Submitting Safety 'C' or 'D' items. All submissions must be made using section C and/or D electronic forms from this link www.railnotices.net.

NEW ITEMS (AR)**EA1380 FENCHURCH ST TO SHOEBURYNESS****WOODGRANGE CLOSE****FROM 0500 HOURS FRIDAY 16 OCTOBER 2026****FPS at 37M 13CH ELR=FSS3**

This FP has been upgraded from the above date to include Red/Green lights to signal to the users of the footpath whether it is safe to cross using the Overlay MSL operating system.

The Overlay MSL System is being introduced to the *Anglia* area at UWC (User Worked Crossings) with limited sighting. This system consists of red/green lights that indicate to the user whether it is safe for them to cross railway. The lights are activated by wheel sensors that operate in a similar way to Axle Counters, when they detect a train, they set the lights to red, after the train hits the strike out sensor the lights go to green.

Would all staff please note that, like Axle Counters, using metal tools or simply passing-by within a metre wearing safety boots can cause activation of these sensors, and should be avoided.

If the sensors fail the lights go into dark mode, they will be reactivated by another train passing or can be reactivated through a manual reset.

As no telephone currently, users will be informed that during any dark modes please revert to STOP, LOOK & LISTEN

(C15122) (C/7535) (16/10/2026) (31)
