SECTION A - TEMPORARY SPEED RESTRICTIONS

(Until further notice unless otherwise specified)

Warning Boards and Indicators provided unless otherwise shown.

† Indicates that the Warning Boards and Indicators will be moved as the work progresses. Where two speeds are shown for a restriction e.g. 20 the Rule Book Module SP, Section 4.3, (differential speed restrictions) applies.

SECTION B - ENGINEERING ARRANGEMENTS.

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

Explanation of change: Signal L265 has been removed from the table.

(D23069) (04/10/2025) (RSSB) (UFN)

ROUTE PROVING USING SEASONAL TREATMENT VEHICLES

Seasonal MPVs – must not be used for Route Proving

In 2017 a Seasonal MPV struck a fallen tree in Scotland which caused damage to the braking system and pulled the brake distributor chord, rendering the brakes ineffective. The MPV became a runaway. Although these exact circumstances are low probability, the impact is extremely high and as such Supply Chain Operations (SCO) do not allow MPVs to be used as Route Provers, because there is an increased risk of coming into contact with debris.

RHTTs

Railhead Treatment Trains (RHTTs) perform the same basic role as MPVs but are loco – hauled. They do not have the same design risk (for potential to runaway) as MPVs. As such SCO do not strictly prohibit the use of RHTTs but strongly advise against such use due to criticality of RHTTs to Autumn train performance.

Given the wider system risk of a damaged RHTT, SCO require director level acceptance of the risk from the affected Route, per instance, before allowing it to be used for Route Proving. Given the notice available for named storms this should always be possible but should anything unexpectedly require this decision on the night SCO would ask that the Route level 2 on-call or shift manager acknowledge this document and positively confirm (to SCO 24:7) acceptance of the risks before we deploy the RHTT. Remember: if it's possible for an RHTT to Route Prove, then it is equally possible for the loco hauling the RHTT to be used instead

MISCELLANEOUS INSTRUCTIONS

REPLACEMENT OF DOO STATION EQUIPMENT AT KENT ROUTE STATIONS

FROM WEDNESDAY 01 MAY 2024 UNTIL WEDNESDAY 01 MAY 2028

*****PLEASE NOTE THE END DATE HAS BEEN EXTENDED SINCE FIRST PUBLISHED*****

Driver Only Operation (DOO) equipment is gradually being replaced. The work mainly entails replacement of monitors and occasionally metalwork such as camera housings and monitor housings with new units at Kent route stations

Work will be undertaken between trains booked to call, or during white periods overnight.

Any queries should be directed to either Darren Goodall, or Doug Mackenzie – NR DOO Section Managers Kent.

(D/5341 – D20688) (27/04/2024) (UFN)
